Filosofi E Animali Nel Mondo Antico:

Filosofi e animali nel mondo antico Silvana Castignone, Giuliana Lanata, 1994 *Analecta Brixiana* Alfredo Valvo, Roberto Gazich, 2007 **Filosofi, animali, questione animale.** Sergio Marini, 2014-05-16 **Animals in Greek and Roman Religion and Myth** Patricia A. Johnston, Attilio Mastrocinque, 2016-08-17 This volume brings together a variety of approaches to the different ways in which the role of animals was understood in ancient Greco Roman myth and religion across a period of several centuries from Preclassical Greece to Late Antique Rome Animals in Greco Roman antiquity were thought to be intermediaries between men and gods and they played a pivotal role in sacrificial rituals and divination the foundations of pagan religion The studies in the first part of the volume examine the role of the animals in sacrifice and divination The second part explores the similarities between animals on the one hand and men and gods on the other Indeed in antiquity the behaviour of several animals was perceived to mirror human behaviour while the selection of the various animals as sacrificial victims to specific deities often was determined on account of some peculiar habit that echoed a special attribute of the particular deity The last part of this volume is devoted to the study of animal metamorphosis and to this end a number of myths that associate various animals with transformation are examined from a variety of perspectives

Interactions between Animals and Humans in Graeco-Roman Antiquity Thorsten Fögen, Edmund V. Thomas, 2017-08-21 The seventeen contributions to this volume written by leading experts show that animals and humans in Graeco Roman antiquity are interconnected on a variety of different levels and that their encounters and interactions often result from their belonging to the same structures networks and communities or at least from finding themselves together in a certain setting context or environment wittingly or unwittingly Papers explore the concrete categories of interaction between animals and humans that can be identified in what contexts they occur and what types of evidence can be productively used to examine the concept of interactions Articles in this volume take into account literary visual and other types of evidence A comprehensive research bibliography is also provided *Aristotle's Zoology and Its Renaissance Commentators, 1521-1601* Stefano Perfetti, 2000 **A Man of Many Interests: Plutarch on Religion, Myth, and Magic**, 2020-03-09 The title of this volume A Man of Many Interests Plutarch on Religion Myth and Magic Essays in honour of Aurelio Perez Jimenez is first and foremost a coalescing homage to Plutarch and to Aurelio and to the way they have been inspiring as master and indirect disciple a multitude of readers in their path to knowledge here metonymically represented by the scholars who offer their tribute to them The analysis developed throughout the several contributions favors a philological approach of wide spectrum i.e. stemming from literary and linguistic aspects it projects them into their cultural religious philosophical and historical framework The works were organized into two broad sections respectively devoted to the Lives and to the Moralia **Animals in the Ancient World from A to Z** Kenneth F. Kittell Jr., 2014-06-23 The ancient Greeks and Romans lived in a world teeming with animals Animals were integral to ancient commerce war love literature and

art Inside the city they were found as pets pests and parasites They could be sacred sacrificed liminal workers or intruders from the wild Beyond the city domesticated animals were herded and bred for profit and wild animals were hunted for pleasure and gain alike Specialists like Aristotle Aelian Pliny and Seneca studied their anatomy and behavior Geographers and travelers described new lands in terms of their animals Animals are to be seen on every possible artistic medium woven into cloth and inlaid into furniture They are the subject of proverbs oaths and dreams Magicians physicians and lovers turned to animals and their parts for their crafts They paraded before kings inhabited palaces and entertained the poor in the arena Quite literally animals pervaded the ancient world from A Z In entries ranging from short to long Kenneth Kitchell offers insight into this commonly overlooked world covering representative and intriguing examples of mammals reptiles amphibians and invertebrates Familiar animals such as the cow dog fox and donkey are treated along with more exotic animals such as the babirusa pangolin and dugong The evidence adduced ranges from Minoan times to the Late Roman Empire and is taken from archaeology ancient authors inscriptions papyri coins mosaics and all other artistic media Whenever possible reasoned identifications are given for ancient animal names and the realities behind animal lore are brought forth Why did the ancients think hippopotamuses practiced blood letting on themselves How do you catch a monkey Why were hyenas thought to be hermaphroditic Was there really a vampire moth Entries are accompanied by full citations to ancient authors and an extensive bibliography Of use to Classics students and scholars but written in a style designed to engage anyone interested in Greco Roman antiquity **Animals in the Ancient World from A to Z** reveals the extent and importance of the animal world to the ancient Greeks and Romans It answers many questions asks several more and seeks to stimulate further research in this important field **Animals in Greek and Roman Thought** Stephen T.

Newmyer,2010-11-09 Although reasoned discourse on human animal relations is often considered a late twentieth century phenomenon ethical debate over animals and how humans should treat them can be traced back to the philosophers and literati of the classical world From Stoic assertions that humans owe nothing to animals that are intellectually foreign to them to Plutarch's impassioned arguments for animals as sentient and rational beings it is clear that modern debate owes much to Greco Roman thought **Animals in Greek and Roman Thought** brings together new translations of classical passages which contributed to ancient debate on the nature of animals and their relationship to human beings The selections chosen come primarily from philosophical and natural historical works as well as religious poetic and biographical works The questions discussed include Do animals differ from humans intellectually Were animals created for the use of humankind Should animals be used for food sport or sacrifice Can animals be our friends The selections are arranged thematically and within themes chronologically A commentary precedes each excerpt transliterations of Greek and Latin technical terms are provided and each entry includes bibliographic suggestions for further reading **Aristotle on Teleology** Monte Ransome Johnson,2005-11-03 Monte Johnson examines one of the most controversial aspects of Aristotle's natural philosophy his

teleology Johnson argues that Aristotle's aporetic approach drives a middle course between these traditional oppositions and avoids the dilemma frequently urged against teleology between backwards causation and anthropomorphism Although these issues have been debated with extraordinary depth by Aristotle scholars and touched upon by many in the wider philosophical and scientific community as well there has been no comprehensive historical treatment of the issue

BOOK JACKET **Mental Illness in Ancient Medicine** ,2018-01-29 In *Mental Illness in Ancient Medicine* From Celsus to Paul of Aegina a detailed account is given by a range of experts in the field of the development of different conceptualizations of the mind and its pathology by medical authors from the beginning of the imperial period to the seventh century CE New analysis is offered both of the dominant texts of Galen and of such important but neglected figures as Rufus Archigenes Athenaeus of Attalia Aretaeus Caelius Aurelianus and the Byzantine compilers The work of these authors is considered both in its medical historical context and in relation to philosophical and theological debates on ethics and on the nature of the soul with which they interacted

Ambiente, animali e umani Isabel Fanlo Cortes, Paolo Donadoni, 2018-09-19 Il volume raccoglie alcuni contributi sul pensiero bioetico di Silvana Castignone professoressa emerita di Filosofia del diritto nell'Università di Genova In particolare i capitoli sono opera di autrici e autori che pur avendo poi intrapreso percorsi accademici e professionali diversi hanno iniziato la loro attività di ricerca nella sezione di Filosofia e Sociologia del diritto del giur. Dipartimento Giovanni Tarello ora Istituto Tarello per la Filosofia del diritto e l'hanno avuto modo di confrontarsi più da vicino con i lavori di Silvana Castignone Il volume si articola in due sezioni entrambe dedicate alla discussione di questioni al centro dell'interesse bioetico di Castignone nella prima parte l'attenzione rivolta ai suoi importanti e innovativi studi sull'etica ambientale e sui diritti degli animali mentre nella seconda il dialogo con temi come il c.d. welfare genetico l'ecofemminismo il multiculturalismo e l'etica della cura di grande rilevanza nel dibattito filosofico contemporaneo

Theophrastus Johannes M. van Ophuijsen, Marlein van Raalte, 2020-12-17 Theophrastus was Aristotle's pupil and second head of the Peripatetic School Apart from two botanical works a collection of character sketches and several scientific opuscula his works survive only through quotations and reports in secondary sources Recently these quotations and reports have been collected and published thereby making the thought of Theophrastus accessible to a wide audience The present volume contains seventeen responses to this material There are chapters dealing with Theophrastus' views on logic physics biology ethics politics rhetoric and music as well as the life of Theophrastus Together these writings throw considerable light on fundamental questions concerning the development and importance of the Peripatos in the early Hellenistic period The authors consider whether Theophrastus was a systematic thinker who imposed coherence and consistency on a growing body of knowledge or a problem-oriented thinker who foreshadowed the dissolution of Peripatetic thought into various loosely connected disciplines Of special interest are those essays which deal with Theophrastus' intellectual position in relation to the lively philosophic scene occupied by such contemporaries as Zeno the founder of the Stoa and Epicurus the founder of the Garden

as well as Xenocrates and Polemon in the Academy and Theophrastus fellow Peripatetics Eudemus and Strato The contributors to the volume are Suzanne Amigues Antonio Battezzato Tiziano Dorandi Woldemar Gorler John Glucker Hans Gottschalk Frans de Haas Andre Laks Anthony Long Jorgen Mejer Mario Mignucci Trevor Saunders Dirk Schenkeveld David Sedley Robert Sharples C M J Sicking and Richard Sorabji The Rutgers University Studies in Classical Humanities series is a forum for seminal thinking in the field of philosophy and this volume is no exception Theophrastus is a landmark achievement in intellectual thought Philosophers historians and classicists will all find this work to be enlightening

The Oxford Handbook of Animals in Classical Thought and Life Gordon Lindsay Campbell, 2014-08-28 The Oxford Handbook of Animals in Classical Thought and Life is the first comprehensive guide to animals in the ancient world encompassing all aspects of the topic by featuring authoritative chapters on 33 topics by leading scholars in their fields As well as an introduction to and a survey of each topic it provides guidance on further reading for those who wish to study a particular area in greater depth Both the realities and the more theoretical aspects of the treatment of animals in ancient times are covered in chapters which explore the domestication of animals animal husbandry animals as pets Aesop's Fables and animals in classical art and comedy all of which closely examine the nature of human animal interaction More abstract and philosophical topics are also addressed including animal communication early ideas on the origin of species and philosophical vegetarianism and the notion of animal rights

Approaching the Ancient Artifact Amalia Avramidou, Denise Demetriou, 2014-08-25 This volume consists of forty contributions written by an internationally renowned selection of scholars The authors adopt an interdisciplinary methodology examining both literary and archaeological sources and a comparative perspective that transgresses national chronological and cultural boundaries in order to investigate the nature of the links between text and image This multifaceted approach to the study of ancient artifacts enables the authors to treat art and artistic production as activities that do not merely mirror social or cultural relationships but rather and more significantly as activities that create social and cultural relationships The essays in this book are motivated by their authors' belief that there is no simple direct link between art and myths art and text or art and ritual and that art should not be relegated to the role of a by-product of a literate culture Instead the contextual and symbolic analyses of artifacts and representations offered in this volume elucidate how art actively shaped myth how it changed texts how it transformed ritual and how it altered the course of local regional and Mediterranean histories

The Animal and the Human in Ancient and Modern Thought Stephen Newmyer, 2016-12-01 Ancient Greeks endeavored to define the human being vis-à-vis other animal species by isolating capacities and endowments which they considered to be unique to humans This approach toward defining the human being still appears with surprising frequency in modern philosophical treatises in modern animal behavioral studies and in animal rights literature to argue both for and against the position that human beings are special and unique because of one or another attribute or skill that they are believed to possess Some of the claims of man's unique

endowments have in recent years become the subject of intensive investigation by cognitive ethologists carried out in non laboratory contexts The debate is as lively now as in classical times and what is of particular note the examples and methods of argumentation used to prove one or another position on any issue relating to the unique status of human beings that one encounters in contemporary philosophical or ethological literature frequently recall ancient precedents This is the first book length study of the man alone of animals topos in classical literature not restricting its analysis to Greco Roman claims of man s intellectual uniqueness but including classical assertions of man s physiological and emotional uniqueness It supplements this analysis of ancient manifestations with an examination of how the commonplace survives and has been restated transformed and extended in contemporary ethological literature and in the literature of the animal rights and animal welfare movements Author Stephen T Newmyer demonstrates that the anthropocentrism detected in Greek applications of the man alone of animals topos is not only alive and well in many facets of the current debate on human animal relations but that combating its negative effects is a stated aim of some modern philosophers and activists
