Gregorio,2024-09-16 We study the supply of fiscal ideas leveraging thousands of electoral platforms from 65 countries in the Manifesto Project to link how political parties discuss fiscal policy with fiscal outcomes We provide three sets of results First fiscal discourse has become increasingly favourable to higher government spending since at least the 1990s in advanced and emerging economies and across the political spectrum This pattern does not track survey trends in voter preferences suggesting that parties have played a role in shifting the focus of political campaigns to fiscal issues to win over voters Second fiscal discourse turns conservative under more adverse fiscal conditions including in the aftermath of debt surges and after the adoption of fiscal rules but only to a limited extent Third over the medium run relative discourse changes in favor of government expansion and away from fiscal restraint are followed by higher fiscal deficits Together our results suggest that adverse shifts in the supply of fiscal ideas could add to fiscal pressures over time **Judicial Politics and**
