Cases in the Environment of Business David W. Conklin, 2006. The Ivey Casebooks Series is a co-publishing partnership between SAGE Publications and the Richard Ivey School of Business at The University of Western Ontario. Due to their popularity in more than 60 countries, approximately 200 new cases are added to the Ivey School of Business library each year. Each of the casebooks comes equipped with instructor's resources on CD-ROM. These affordable collections will not only help students connect to real-world situations but will benefit corporations seeking continued education in the field as well. Broadening the scope of environmental forces to a global rather than a domestic context leads to cross-country comparisons that add complexity to the subject matter, enrich analytical theories, and heighten the interest of students. Students gain an appreciation for the many ways in which environmental forces interact, creating a set of risks and opportunities that is unique in each country and that must be evaluated in formulating trade and investment decisions. *Cases in the Environment of Business* offers an outstanding collection of relevant classroom-tested cases. In discussing the cases, students will participate in managerial decisions in an international context. Most cases deal with a variety of environmental forces, but generally a single set of forces plays a predominant role. The instructor's resources on CD-ROM include detailed 6-10 page case notes for each case, preparation questions for students to review before class, discussion questions, and suggested further readings. *Cases in the Environment of Business* addresses the following five sets of environmental forces: Industry Structure Responses to strategies of customers, suppliers, and competitors; dependence of profitability on unique value-added attributes and the shift of certain activities to low-wage countries; Macroeconomic Variables: Income levels and growth rates, foreign exchange rates, inflation rates, interest rates, and unemployment rates; Political Variables: Regulations, financial incentives, taxation, foreign investment restrictions, and international trade and investment agreements; Societal Variables: Labor and environmental practices, ethics, corporate social responsibility, boards of directors, and demographics; Technological Variables.
