Auer, 2005-11 Among the most costly and complicated chapters in the former Eastern bloc countries transitions to democracy is the clean up and restoration of the environment Even as Communist era environmental problems fade in significance such as pollution from heavy industry new threats have emerged Urban sprawl increasing pollution from

mobile sources and other problems familiar to Western European citizens now plague the East These problems are compounded by the lack of transparency and accountability in former Eastern bloc environmental regulatory institutions and the general weakness of environmental authorities and nongovernmental organizations vis vis powerful pro development interests Restoring Cursed Earth considers how rule making sanctions incentives and programs shape environmental protection efforts and whether and to what extent these emerging policy structures are promoting environmental well being for citizens in Russia the Czech Republic Hungary Romania and Estonia In addition informal institutions such as illegal and corrupt acts language and ties of affection between family and friends are explored as key determinants of environmental reforms

Osmel Manzano,Roberto Rigobon,2001 It has been widely believed that resource abundant economies grow less than other economies In a very influential paper Sachs and Warner 1997 point out that there is a negative relationship between resource abundance and growth Two important econometric problems are present in the traditional empirical literature First the result might depend on factors that are correlated with primary exports but that have been excluded from the regression Second total GDP includes the production in the resource sector that has been declining in the last 30 years We correct for those issues Our results indicate that the so called Natural Resource Curse might be related to a debt overhang In the 70 s when commodities prices were high natural resource abundant countries used them as collateral for debt The 80 s witnessed an important fall in the prices that drove these countries to debt crises When we estimate the model taking these into account we found that the effect of resource abundance disappears
