Graham, 2013 *Introduction To Corporate Finance* William L. Megginson, Scott B. Introduction to Financial Management Iqbal Mathur, 1979 Introduction to Financial Management Charles W. Haley, Lawrence D. Schall, Barry Schachter, 1987 **An Introduction to Financial Management**

Pringle, 1980 *Financial Management : an Introduction* Stephen Hunt Archer, 1979 *Financial Management* Jim McMenamin, 2002-09-11 Finance is a notoriously difficult core subject for business undergraduates which many find difficult to understand The area has been dominated by large and complex introductory texts often from the US which many lecturers find too detailed and unwieldy This carefully developed and researched text will fill this gap by providing a succinct modular UK focused introduction to the subject of financial management Quality controlled by an academic review panel the content and approach has been rigorously developed to answer the needs of non finance students

The user friendly features and design will be of great appeal to the many undergraduates who find finance a difficult subject. Examples, models, formulas and exercises are lucidly and clearly presented, supported by strong pedagogical features, learning objectives, worked examples, key learning points, further reading, practical assignments, references, case studies and teacher's guide. Introduction to Financial Management O. Maurice Joy, 1980 An Introduction to Financial Management Richard Dobbins, 1993 Introduction to Financial Management Dickerson, Dickerson, Debra, 1994-05 Introduction to Financial Management Eugene F. Brigham, B.J. Campsey, Bodie Dickerson, 1994-10-01 *Financial Management* Wilbur G. Lewellen, John A. Halloran, 2002-08-01. This text represents a unique approach to introductory corporate finance. Although many texts have embraced the theme of shareholder wealth maximization, this book thoroughly carries out this theme in a uniquely consistent and unified fashion. It establishes the notion that a discounted cash flow mode captures the market valuation process. It then applies this concept of valuation not only to the typical analysis of capital expenditure decisions and cost of capital but also to working capital management, financial budgeting and planning and international financing and investing decisions. Additionally, this text is further differentiated by superior substantive and systematic treatment of the investing and financing decisions of multinational firms as part of the core managerial process.
