# Financing In The European Community

**Andrew Evans**

## **Financing In The European Community:**

**Financing the European Community** Michael Shackleton, 1990 The operation and structure of collective revenue and expenditure are always the subject of lively debate in the European Community In February 1988 agreement was reached on the so called Delors package which sets the framework for the EC budget over the longer term This agreement made important innovations with regard to the level of agricultural expenditure spending on other policies and the development of own resources Subsequent decisions altered the institutional arrangements for managing the EC budget This paper examines the implementation of these decisions and assesses the implications for the future financing of the EC *Future Financing of the European Union* Great Britain. Parliament. House of Lords. European Union Committee, 2005 Negotiations are underway to agree the details of the European Union budget for the period of 2007 to 2013 known as the Financial Perspective covering the newly enlarged EU of 25 member states Further enlargement is likely with Bulgaria and Romania due to join in 2007 and the possible accession of Croatia and Turkey being considered The Committee's report considers a range of issues in relation to the current budget debate including the merits of the Commission's proposals within the framework of recent and future EU enlargement the Common Agricultural Policy Structural and Cohesion Funds the Lisbon Agenda other spending categories the functioning of the Own Resources and a EU tax UK abatement and the Commission's proposal for a Generalised Corrective Mechanism Conclusions reached include support for the UK Government's insistence that the UK rebate is non negotiable given the inadequate reforms of the CAP however if real reform of the budget was offered then the UK Government should be prepared to negotiate Structural funds should be focused on the 10 new member states as well as the two applicant countries of Romania and Bulgaria with the phasing out of EU regional development funds for all old member states with the exception of Greece and Portugal **Funding the European Union** Great Britain:

Parliament: House of Lords: European Union Committee, 2007-03-14 This report finds that the funding of the EU is complex and lacks transparency and that there is a need for a simpler system that would reduce the administrative burden It concludes that a Gross National Income based revenue source is the best way of providing the bulk of the budget's funding Apart from other considerations the Committee has seen no evidence that any other new form of taxation would provide the same level of clarity and certainty **Making the EU's Multiannual Financial Framework Fit for Purpose** Matthias

Busse, Ms. Huidan Huidan Lin, Malhar Nabar, Mr. Malhar S Nabar, Jia Yoo, 2025-06-13 The European Union's budget known as the Multiannual Financial Framework MFF has over time been a key tool for enhancing economic efficiency achieving redistribution and helping the Union tackle pressing challenges As the Union navigates an increasingly complex global environment and faces looming structural and demographic changes it is increasingly evident that decisive EU level actions will be needed to boost productivity and resilience The MFF is a critical policy lever that can enable the needed EU level actions This paper argues for three key changes to the next MFF 2028-34 to help the budget play this role First bottom up

estimates of investment needs suggest that spending on European Public Goods to boost productivity and resilience needs to be increased to at least twice the current level While this would require an at least 50 percent increase in the budget's size or about 0.6 percent of EU GNI annually if spending on programs such as the Cohesion Policy and Common Agricultural Policy is kept unchanged focusing on activities that maximize positive externalities and reduce costly duplication can generate net positive values for member states Second reforms are needed to make the budget more streamlined responsive to evolving needs and more effective by incentivizing good performance Lastly the financing framework should be strengthened by integrating borrowing as a regular tool alongside greater own resources to bolster debt service capacity Increasing own resources by about 0.2 percent of GNI annually to cover peak debt servicing costs along with additional reserves for unexpected challenges would likely provide financial security to support the proposed increase in the budget A clearer focus on strategic investments and measurable outcomes will reinforce the budget's positive sum value helping build support for a more ambitious EU budget

**EU Development Cooperation Policy** Van den Sanden, Tina, 2022-06-16

Timely and incisive this book offers a critical insight into the legal structure of EU development cooperation policy exploring the innate complexities that give rise to legal challenges in this crucial area of EU external action Investigating the interaction between the key tenets of coherence and conferral Dr Tina Van den Sanden assesses how the Union's legal framework affects the attainment of its development cooperation objectives

*Green Finance in the European Union* Marta Postuła, Mariusz Lipski, 2024-09-02 While global challenges continue to reshape the here and now public and corporate finance management needs to adapt quickly to increase the efficiency of institutions enterprises and policies to face our new reality There are very few publications that offer a comprehensive approach to the financing of environmental protection activities by the European Union This book explores this topic from various angles and levels as well as highlighting the determinants that influence micro and macro level decisions in this area It presents an in depth and unique analysis of the sources of funding for environmental measures implemented by European Union institutions against the backdrop of national expenditure by Member States and analyses the plausibility of the adopted targets in the run up to 2050 in the context of the war in Ukraine and ad hoc energy policy solutions This book is a voice in an ongoing discussion among the community of practitioners and theoreticians on sources of financing for the energy transition to achieve independence from Russian sources in the quickest possible timeframe It demonstrates that environmental measures cannot occur without the financial participation of economic actors and financial institutions particularly the capital market and further underscores the scale of involvement in environmental projects as measured by the value of green loans and green bonds covered by European financial institutions The authors offer policy recommendations for financing activities related to environmental policy notably energy transition This book will appeal to scholars students and researchers of corporate finance banking strategic and public finance management as well as policymakers and practitioners involved in green finance investments

### Financial Markets (Dis)Integration in a Post-Brexit EU Dieter Pesendorfer,2020-01-11

The European Union is creating a Financial Union with a European Banking Union and a Capital Markets Union in reaction to lessons learned from incomplete financial markets integration the Global Financial Crisis and European Sovereign Debt Crisis This book critically analyses these projects for a more integrated resilient and sustainable financial system at a time when the United Kingdom as the member state with the most developed capital markets and the leading global and European financial center the City of London is leaving the Union Neoliberal financial globalization and markets integration policies have led to finance led capitalism that caused the crises By building on pre crises integration ideas the Union revives and expands the reach of capital markets based financing and shadow banking The book discusses the consequences of deeper integration and the future of European financial centers advocating an alternative financial markets integration based on theories explaining financialization and finance led capitalism

### *Latin American Economic Outlook 2024 Financing*

*Sustainable Development* OECD,Economic Commission for Latin America and the Caribbean,CAF Development Bank of Latin America,European Commission,2024-12-09 In order to fund their ambitious sustainable development agendas Latin American

and Caribbean countries need to expand their financing sources This 17th edition of the Latin American Economic Outlook proposes a series of policy options to mobilise the necessary resources based on co-ordinated actions between policy makers the private sector and their international partners It argues that public resources should be invested more efficiently tax better collected and debt better managed Even with those improvements private resources will be equally crucial as public revenues will not be enough to fund the deep transformations the region needs The depth access inclusiveness and efficiency of financial systems must improve further especially for the benefit of citizens and smaller firms Businesses need stronger capital markets to finance their long term investment projects The report's recommendations include the use of innovative financial instruments renewing the role of development finance institutions reinvigorated international partnerships to mobilise external resources and the adoption of a shared regional agenda to address the challenging international financing context
