Robert E. Mutch, 2014 *Buying the Vote: A History of Campaign Finance Reform* analyzes the rise and decline of campaign finance reform by tracking changes in the funding of presidential campaigns and changes in the debate over reforming fundraising practices. An examination of Supreme Court decisions shows how the Court has fashioned a profoundly inequalitarian redefinition of American democracy. **Packaging The Presidency** Kathleen Hall Jamieson, 1996-06-20

Packaging the Presidency Third Edition is now completely updated to offer the only comprehensive study of the history and effects of political advertising in the United States. Noted political critic Kathleen Hall Jamieson traces the development of presidential campaigning from early political songs and slogans through newsprint and radio and up to the inevitable history of presidential campaigning on television from Eisenhower to Clinton. The book also covers important issues in the debate about political advertising by touching on the development of laws governing political advertising as well as how such advertising reflects and at the same time helps to create the nature of the American political office. Finally, current public concerns about political advertising are addressed as Jamieson raises the topic of ads dealing mainly in images rather than issues and of political aspirations becoming increasingly only for the rich who can afford the enormous cost of television advertising.

Comparative Issues in Party and Election Finance F. Leslie Seidle, 1991-01-01 This book is one of 23 volumes of research commissioned by the Royal Commission on Electoral Reform and Party Financing and one of five volumes within this series dealing specifically with party and election finance. Because the issue of money in elections is as old as democracy, the experience of other countries is instructive. The studies in this volume offer Canadians information about approaches to funding political parties and elections in the United States and Western Europe. The studies by Herbert Alexander and Robert Mutch examine how the United States has approached issues such as contribution limits and the disclosure of election finances. The latter study provides explicit comparisons to Canada, noting the constitutional role of the Supreme Court in each country. Jane Jenson draws on Western European experience to propose and assess reforms for the public funding for party foundations. This is documented by Michael Pinto-Duschinsky. The studies approach their material from a historical perspective, noting the uniqueness of the constitutions, institutions, and traditions of the countries reviewed. The authors provide background essential to any consideration of whether foreign experience might serve as a model for Canada. **The Losing**

Parties Philip A. Klinkner, 1994-11-30 How do Democratic and Republican party leaders react after their party has lost a presidential election? Is there a pattern of response to defeat that reflects the distinctive cultures of the two parties? This book answers these questions by examining how the two national party organizations have responded to presidential election defeats between 1956 and 1993. Drawing on party documents, interviews with party officials, and contemporary accounts, Philip Klinkner provides detailed case studies of opposition party politics. He shows that Republican national committees have reacted to losses by making organizational changes to improve campaign technology and fundraising, and that losing Democrats have sought to refine or make more democratic their internal procedures for selecting delegates to the national

convention or for choosing presidential candidates Klinkner suggests that the reasons for these reactions stem from the historical development of the parties The organizational response of the Republican party is the result of its long term relationship with business its homogeneity and hierarchical structure and its minority party experience The Democrats emphasis on participation and representation for its constituent elements is based on its characteristic composition of social and economic out groups its heterogeneity and decentralization and its tradition as the majority party

Big Business in America Thomas J. Dorich, 2021-02-03 This study analyzes the influence of big business on the economic political and social structure of twentieth century America The author examines the development of a mass production and consumption economy and argues that the corporation became a key institutional force in the United States

The Financiers of Congressional Elections Peter L. Francia, 2003 Individual donors play a critical role in financing congressional elections accounting for more than half of all money raised in House campaigns But significant donors defined here as those contributing more than 200 are the least understood participants in the system Defenders assert that contributing money to campaigns is part of a broader pattern of civic involvement and is free speech that gives a voice to various interests

Detractors argue that these contributions are undemocratic enabling wealthy citizens to overwhelm the voices of the many and to promote narrow business and policy interests These divergent assessments were raised in connection with the Bipartisan Campaign Finance Reform Act of 2002 and continue to characterize the debate over campaign finance reform So who really contributes and why How much and to how many candidates What are the strategies used by political campaigns to elicit contributions and how do the views of significant donors impact the campaign finance system What do donors think about campaign finance reform This book investigates these vital questions describing the influence of congressional financiers in American politics *Financing the 2020 Election* Molly E.
