**Management** Thomas Rolf,2004-01-30 Inhaltsangabe Abstract The submitted dissertation critically discusses business models in the context of customer dimensions under uncertain market conditions The following questions summarise the fields of investigation How do business models adapt to rapidly changing and buyer driven markets What are the next two steps after Customer Relationship Management Can the gap in the process chain between Customer Relation Management and Supply Chain Management be bridged and how How can a method be developed in order to measure the current customer orientation of a company and to compare companies among each other Are customer oriented companies more profitable As a deductive research approach is used beneath a small number of inductive elements an investigation in both secondary and primary data is imperative Subsequently a critical review of related literature along with a supporting inquiry is part of the dissertation The scope of the work includes background information the discussion of future business models as well as an empiric impression of customer orientation in German small and medium sized enterprises The most significant conclusions can be recapitulated as follows Simple customer orientation can lead to less innovation furthermore to unprofitable business and in the worst case to the elimination of a company Customer oriented strategy is about building processes that are able to react to any environmental or economical modification as fast as possible The evolution of Customer Relation Management will lead to new customer driven and pulled business models including innovative measurement methods like Return on Customer The gap between Customer Relation Management and Supply Chain Management will in all probability be bridged new concepts e g Customer Chain Management will represent this task A balanced Customer Centric Index developed as a benchmark instrument as part of the dissertation shows that only a third of the examined companies can be interpreted as customer oriented on the other hand Sales Marketing is regarded as the initial and most influencing process A statistical connection between being customer oriented and profit could not be proved As a surprising and unintentional result the survey revealed that focusing on a small market niche is at least for SME a more profitable business Eventually the dissertation leaves behind additional questions that could not be

Nilsson,Robert Anthony,Vijay Govindarajan,2020-11-05 EBOOK Management Control Systems 2e    *How Management  
Programs Can Improve Organization Performance* Richard E. Crandall,William Crandall,2015-02-01 All organizations operate  
in an environment that is rapidly changing To be successful the organization must also change The question is what to  
change and how This book will describe in some detail a number of management programs many of which are known by their  
three letter acronyms such as Just in Time JIT or Service Oriented Architecture SOA A management program is designed to  
improve an organization's effectiveness and efficiency However there are so many management programs it is often difficult  
for managers to decide which one would be most appropriate for their operation This book will describe an array of  
management programs and group them to indicate their primary purpose The book will also outline a process that will enable  
managers to select the most appropriate management program to meet their immediate and long term needs Implementing a  
management program is no small task It can be expensive time consuming and disruptive of normal operations therefore the  
choice of the management program requires careful selection and implementation Care must be taken to increase the  
likelihood of successfully implementing new ventures in all types of organizations business nonprofit and governmental  
agencies Many ventures fail or achieve limited success not because the idea isn't good but because the organization has not  
adequately prepared its internal capabilities to meet the environmental conditions in which it operates An important feature  
of this book is that it can be updated periodically to add new programs and phase out programs no longer relevant The book  
will provide readers with a comprehensive description of the most popular management improvement programs and their  
primary applications to their organizations We will discuss the philosophy and principles of these programs and include a  
discussion on how to use each program to achieve optimum success A central theme of this book is to not just adopt an  
improvement program for the sake of adopting it but to match the improvement program with the specific needs in an  
organization In the chapters that follow we will illustrate how this matching process can be conducted Above all we plan the  
book to be a concise and useful resource to both practitioners and academics Here is what you can expect in the chapters
