Efficient Electricity Use Howard S. Geller, 1991 More efficient have enormous benefits energy use can for a developing country Brazil has one of the most successful and advanced electricity conservation efforts among developing countries This book describes the progress in electricity conservation in Brazil and the potential for further efficiency improvements It indicates how implementation of electricity conservation measures can be accelerated and how those in the U S and other countries can help Brazil Chapters cover technologies for electricity conservation barriers to implementing more efficient electricity use electricity conservation policies industrial structure and electricity use demand forecasting and scenarios for future electricity use The Brazilian experience provides insights and lessons that are relevant throughout the world It was prepared in cooperation with Eletrobras Brazil s national electric utility and the University of Sao Paulo *Demand-Side Management and Electricity End-Use Efficiency* A. de Almeida, Arthur H. Rosenfeld, 2012-12-06 A NATO Advanced Study Institute on Demand Side Management and Electricity End Use Efficiency was held in order to present and to discuss some of the most recent developments in demand side electric power management and planning methodologies as well as research progress in relevant end use technologies Electricity is assuming an increasingly important role in buildings and industry due to its flexibility efficiency of conversion and cleanliness at the point of use However the production and transmission of electricity requires huge investments and may have undesirable environmental impacts The recent nuclear accident in Chernobyl and the damage caused by acid precipitation are creating increasing concerns about the impacts of power plants Some environmental problems are local or regional others such as global warming can affect the whole world Although environmental impacts may be minimized with additional investments electricity generation will become even more capital intensive Energy and electricity in particular is not directly consumed by people To achieve improved standards of living what is important is the level of production of goods and services If it is possible to produce the same quantity of goods and services with less electricity and in a cost effective way substantial benefits can be gained By reducing costs electricity efficiency can raise the standards of living and increase the competitiveness of an economy Electricity efficiency also leads to reduced requirements in power plant operation thus leading to reduced consumption of primary energy supplies and a higher quality environment
