

Ego State Boundaries

- It is useful to think of each ego state as having boundaries.
- Berne suggests that ego boundaries can be thought of as **semi permeable membranes** through which psychic energy can flow from one ego state to another.
- Ego boundaries must be semi permeable otherwise psychic energy would be bound up in one ego state and unable to move about spontaneously as situations change.

How Humans Relate John Birtchnell, 1996 In this book John Birtchnell offers a new theory as the basis for a science of relating While links can be made between it and classical interpersonal theory it has many new and original features The theory states that the relating of humans must have evolved out of and be in continuity with the relating of all other animals The fundamental relating objective of both humans and animals can most easily be defined Identifying That Basic Framework Of Motives Which Is Common To Both Birtchnell proposes that such a framework is best constructed around two major axes a horizontal one concerning the degree to which we need to become involved with or separated from others and a vertical one concerning the degree to which we choose to exercise power over others or permit others to exercise their power over us We differ from other animals in the horizontal axis in the extent to which we have expanded our proclivity for close involvement and on the vertical axis in the extent to which we have become prepared to utilize such forms of power as we have or have acquired for

the benefit of others As a consequence of our greater involvement we are capable of being concerned about and respectful of the needs of others and trusting of those who are prepared to utilize their power for our benefit though we remain capable of being disrespectful and non trusting The four objectives derived from the proposed framework are called closeness distance upperness and lowerness and a large part of the book is devoted to describing their characteristics The book also explores the use of the framework as a means of classifying personality disorders and mental illness This book should be of interest to professionals and students interested in human relationships including psychiatrists clinical and social psychologists and psychotherapists
