Allusion as Narrative Premise in Brahms's Instrumental Music Jacquelyn E. C. Sholes, 2018-05-24 Who inspired Johannes Brahms in his art of writing music In this book Jacquelyn E C Sholes provides a fresh look at the ways in which Brahms employed musical references to works of earlier composers in his own instrumental music By analyzing newly identified allusions alongside previously known musical references in works such as the B Major Piano Trio the D Major Serenade the First Piano Concerto and the Fourth Symphony among others Sholes demonstrates how a historical reference in one movement of a work seems to resonate meaningfully musically and dramatically with material in other movements in ways not previously recognized She highlights Brahms s ability to weave such references into broad movement spanning narratives arguing that these narratives served as expressive outlets for his complicated sometimes conflicted attitudes toward the material to which he alludes Ultimately Brahms s music reveals both the inspiration and the burden that established masters such as Domenico Scarlatti J S Bach Haydn Mozart Schubert Schumann Wagner and especially Beethoven represented for him as he struggled to emerge with his own artistic voice and to define and secure his unique position in music history

proposes answers to many of the opera's unresolved questions WINNER of the Mozart Society of America Marjorie Weston Emerson Award for 2008 This study proposes a hypothesis to account for some of the opera's long standing problems It suggests that Mozart considered the idea that the pairings in Act II should not be crossed that each of the two disguised officers should seek to seduce his own woman Although this alternative plot structure was rejected signs of it may remain in the final score in the uneasy co existence of dramatic duplicity and musical sincerity and in the ending in which the easy restitution of the original couples seems not to take account of the new passions that have been aroused Evidence that several of the singers were re cast is also presented In addition to these radically new ideas about the conceptual genesis of Cos the book also provides a full account of the work's compositional history based on early Viennese and Bohemian copies Four different versions are identified including a significant revision in which Mozart removed the Act II finale canon The composer's probable involvement in the 1791 Prague production is also discussed IAN WOODFIELD is Professor of Historical Musicology School of Music and Sonic Arts Queen's University Belfast
