## **Eilhard Mitscherlich Prince Of Prussian Chemistry:**

Eilhard Mitscherlich, Prince of Prussian Chemistry Hans-Werner Schütt, 1997 Eilhard Mitscherlich 1794 1863 holds an important position among the chemists who created the basis of post-Lavoisier chemistry His discoveries of isomerism and polymorphism his pioneering work on catalysis and his research on benzene and benzene derivatives the formation of ethers and alcoholic fermentation belong to the truly fundamental achievements of classical chemistry In 1822 at the instigation of his mentor Berzelius Mitscherlich became the successor of Klaproth both as member of the Royal Prussian Academy of Sciences and as full professor at the Friedrich Wilhelm University Despite his long quarrels with Liebig the most influential chemist in Germany Mitscherlich remained the most eminent representative of chemistry in Prussia When he died an epoch of chemistry in Berlin drew to an end Women in Chemistry Marelene F. Rayner-Canham, Geoffrey Rayner-Canham, 1998 Though rarely noted women have been active participants in the chemical sciences since the beginning of recorded history This thought provoking book brings to life the many talented women who besides the universally respected Marie Curie made significant contributions to chemistry The Rayner Canhams examine the forces that have defined women's roles in the progress of chemistry observing that many were thwarted from capitalizing on their achievements by the prejudices of their time Their book discusses women chemists from as far past as the Babylonian civilization but focuses on professional women chemists from the mid 19th century when women gained access to higher education Read this book and learn about the chemist assistants of the French salons about independent researchers in the 19th century about the three disciplinary havens for women in the 20th century about how war helped bring women into the chemical industry and much more

**Philosophical Chemistry** Manuel DeLanda, 2015-05-21 Philosophical Chemistry furthers Manuel DeLanda's revolutionary intervention in the philosophy of science and science studies Against a monadic and totalizing understanding of science DeLanda's historicizing investigation traces the centrality of divergence specialization and hybridization through the fields and subfields of chemistry The strategy followed uses a series of chemical textbooks separated from each other by fifty year periods 1750 1800 1850 and 1900 to follow the historical formation of consensus practices The three chapters deal with one subfield of chemistry in the century in which it was developed eighteenth century inorganic chemistry nineteenth century organic chemistry and nineteenth century physical chemistry This book creates a model of a scientific field capable of accommodating the variation and differentiation evident in the history of scientific practice DeLanda proposes a model that is made of three components a domain of phenomena a community of practitioners and a set of instruments and techniques connecting the community to the domain Philosophical Chemistry will be essential reading for those engaged in emergent radical and contemporary strands of thought in the philosophy of science and for those scholars and students who strive to practice a productive dialogue between the two disciplines **Comprehensive Chemometrics**, 2009-03-09 Designed to serve as the first point of reference on the subject Comprehensive Chemometrics presents an integrated

**Molecular World** Catherine M. Jackson, 2023-07-04 A compelling and innovative account that reshapes our view of nineteenth century chemistry explaining a critical period in chemistry's quest to understand and manipulate organic nature According to existing histories theory drove chemistry's remarkable nineteenth century development In *Molecular World* Catherine M Jackson shows instead how novel experimental approaches combined with what she calls laboratory reasoning enabled chemists to bridge wet chemistry and abstract concepts and in so doing create the molecular world Jackson introduces a series of practice based breakthroughs that include chemistry's move into lampworked glassware the field's turn to synthesis and subsequent struggles to characterize and differentiate the products of synthesis and the gradual development of institutional chemical laboratories an advance accelerated by synthesis and the dangers it introduced Jackson's historical reassessment emerges from the investigation of alkaloids by German chemists Justus Liebig August Wilhelm Hofmann and Albert Ladenburg Stymied in his own research Liebig steered his student Hofmann into pioneering synthesis as a new investigative method Hofmann's practice based laboratory reasoning produced a major theoretical advance but he failed to make alkaloids That landmark fell to Ladenburg who turned to cutting edge theory only after his successful synthesis In telling the story of these scientists and their peers Jackson reveals organic synthesis as the ground chemists stood upon to forge a new relationship between experiment and theory with far reaching consequences for chemistry as a discipline

**Introducing the Chemical Sciences** Chemical Heritage Foundation, 1997 An introductory guide that is designed particularly for teachers and their students but is useful in many other contexts This new edition lists reference works histories of science and technology histories of the chemical sciences and industries including company histories autobiographies and biographies edited classical texts and journals

**From Natural Philosophy to the Sciences** David Cahan, 2003-09-15 During the 19th century much of the modern scientific enterprise took shape scientific

disciplines were formed institutions and communities were founded and unprecedented applications to and interactions with other aspects of society and culture occurred taught us about this exciting time and identify issues that remain unexamined or require reconsideration They treat scientific disciplines biology physics chemistry the earth sciences mathematics and the social sciences in their specific intellectual and sociocultural contexts as well as the broader topics of science and medicine science and religion scientific institutions and communities and science technology and industry From Natural Philosophy to the Sciences should be valuable for historians of science but also of great interest to scholars of all aspects of 19th century life and culture      **Robert Burns Woodward** Otto Theodor Benfey, Peter John Turnbull Morris, 2001 Robert Burns

Woodward was the star of 20th century organic chemistry An MIT graduate by age 19 Woodward s ingenious notions about organic synthesis and his artful methodology were astounding He is most famed for his synthesis of vitamin B12 which he undertook with Albert Eschenmoser and for the orbital symmetry rules he developed with Roald Hoffmann This volume presents Woodward s most celebrated papers and lectures including the famous Cope lecture Insightful commentaries and rarely seen photographs are also included      *The Cambridge History of Science: Volume 5, The Modern Physical and Mathematical Sciences* David C. Lindberg, Mary Jo Nye, Roy Porter, Ronald L. Numbers, 2003 A new and comprehensive examination of the history of the modern physical and mathematical sciences      Taghi Erani, a Polymath in Interwar Berlin

Younes Jalali, 2018-08-28 A prominent civil servant scientist and intellectual Taghi Erani was a pivotal figure in interwar Iran Witness to two of the major political upheavals in the twentieth century the rise of Pahlavi and the collapse of the Weimar Republic he turned from fundamental science to leftwing activism and pacifism leading to his arrest and death in prison Younes Jalali traces his journey from Tehran to Berlin where in the 1920s he crossed paths with the greatest German scientists and scholars of his day including Max Planck Albert Einstein and Friedrich Rosen and published seminal works on psychology and political philosophy In the 1930s as Reza Shah pursued rapprochement with the Third Reich Taghi Erani was caught up in a crackdown on left wing and pro labor activists His life and death offer a unique lens through which to view modern Iranian intellectual and political history      **The Coming of Materials Science** R.W. Cahn, 2001-03-16 The Coming

of Materials Science both covers the discipline of materials science and draws an impressionistic map of the present state of the subject The first chapter examines the emergence of the materials science concept in both academe and industry The second and third chapters delve back into the prehistory of materials science examining the growth of such concepts as atoms crystals and thermodynamics and also examine the evolution of a number of neighbouring disciplines to see what helpful parallels might emerge The book contains numerous literature references Many refer to the earliest key papers and books while others are to sources often books offering a view of the present state of a topic Early references are to the past but as the book continues it brings the reader up to date with more recent sources The author Professor Robert Cahn FRS has striven to be critical about the history of the discipline of materials science and to draw general conclusions about

scientific practice from what he has discovered about the evolution of materials science Further issues that the book highlights include What is a scientific discipline How do disciplines merge and differentiate Can a discipline also be interdisciplinary Is materials science a real discipline A large range of themes is presented in the book and readers are invited to interact with the author if they reach alternative conclusions This book is not just for reading and reference but exists to stimulate thought and provoke discussion as well

**The Shadow of Enlightenment** Theresa Levitt, 2009-01-08 This work examines the intersection of science and politics in the work of François Arago and Jean Baptiste Biot the principle architects of the optical revolution of early nineteenth century France Their disagreement over the optical accessibility of the world played out across a wide range of French culture

**A Well-Ordered Thing** Michael D. Gordin, 2019 Dmitrii Mendeleev 1834 1907 is a name we recognize but perhaps only as the creator of the periodic table of elements Generally little else has been known about him A Well Ordered Thing is an authoritative biography of Mendeleev that draws a multifaceted portrait of his life for the first time As Michael Gordin reveals Mendeleev was not only a luminary in the history of science he was also an astonishingly wide ranging political and cultural figure From his attack on Spiritualism to his failed voyage to the Arctic and his near mythical hot air balloon trip this is the story of an extraordinary maverick The ideals that shaped his work outside science also led Mendeleev to order the elements and eventually to engineer one of the most fascinating scientific developments of the nineteenth century A Well Ordered Thing is a classic work that tells the story of one of the world's most important minds
