Sculpture Collections in Early Modern Spain is the first book to assess the phenomenon of sculpture collecting and in doing so it alters the previously held notion that Spanish society placed little value in this art form Di Dio and Coppel reveal that due to the problems and expense of their transport from Italy sculptures were in fact status symbols in the culture Thus they were an important component of the collections formed by the royal family cultivated noble collectors humanists and artists who had pretensions of high status This book is especially useful to specialists for its discussion of the typologies of collections and objects and of the mechanics of state gifts transport and collection display in this period An appendix presents extensive archival documentation most of which has never before been published The authors have uncovered hundreds of new documents about sculpture in Spain and new documentary evidence allows them to propose several new identifications and attributions Firmly grounded in extensive archival research Sculpture Collections in Early Modern Spain redefines the socio political and art historical importance of sculpture in early modern Spain Most importantly it entirely transforms our knowledge regarding the presence of sculpture in a wide range of Spanish collections of the period which until now has been erroneously characterized as close to non existent
