The living marine resources of the Eastern Central Atlantic. Volume 4: Bony fishes part 2 (Perciformes) Food and Agriculture Organization of the United Nations, 2018-11-15 This multivolume field guide covers the species of interest to fisheries of the major marine resource groups exploited in the Eastern Central Atlantic. The area of coverage includes FAO fishing area 34 and part of 47. The marine resource groups included are bivalves, gastropods, chitons, cephalopods, stomatopods, shrimps, lobsters, crabs, hagfishes, sharks, batoid fishes, chimaeras, bony fishes, and sea turtles. The introductory chapter outlines the environmental, ecological, and biogeographical factors influencing the marine biota and the basic components of the fisheries in the Eastern Central Atlantic. Within the field guide, the sections on the resource groups are arranged phylogenetically according to higher taxonomic levels such as class, order, and family. Each resource group is introduced by general remarks on the group, an illustrated section on technical terms and measurements, and a key or guide to orders or families. Each family generally has an account summarizing family diagnostic characters, biological and fisheries information, notes on similar families occurring in the area, a key to species, a check list of species, and a short list of relevant literature. Families that are less important to fisheries include an abbreviated family account and no detailed species information. Species in the important families are treated in detail, arranged alphabetically by genus and species, and include the species name, frequent synonyms, and names of similar species; an illustration; FAO common names; diagnostic characters; biology and fisheries information; notes on geographical distribution; and a distribution map. For less important species, abbreviated accounts are used. Generally, this includes the species name, FAO common names, an illustration, a distribution map, and notes on biology, fisheries, and distribution. Each volume concludes with its own index of scientific and common names.
