Electricity Industry And Class In South Africa:

Electricity, Industry and Class in South Africa Renfrew Christie, 1984-06-18 **South Africa's Energy Transition**
Andrew Lawrence, 2019-08-30 This book provides a succinct overview of the evolution of policies addressing energy and climate justice in South Africa Drawing on a range of analytical perspectives including socio technical studies just transitions and critical political economy it explains why South Africa s energy transition from a coal dependent centralised power generation and distribution system has been so slow and reveals the types of socio political inequalities that persist across regimes and energy sources Topics explored include critical approaches to the South African state and its state owned energy provider Eskom the political ecologies of coal and water the politics of non renewable energy alternatives as well as the trajectory and fate of the Renewable Energy Independent Power Producers Procurement Programme REIPPPP the country s major renewable energy policy The book concludes with reflections on alternative neglected energy and development paths suggesting how the political economy of South Africa s energy system could be further transformed for the better *The Political Economy Of South Africa* Ben Fine, 2018-02-12 Democratization in South Africa has been accompanied by continuing and even deepening economic inequalities Rather than proposing a blueprint for a more equitable economic system this book presents the results and implications of wide ranging research on the history and current dynamics of the South African economy over the past fifty years The authors analyze a range of strategic economic trajectories linking these to the shifting balance of economic and political power and they set the parameters within which the economic and political debates are conducted The acclaim with which democratization in South Africa has been greeted has been tempered by the recognition that there are at the same time continuing and even deepening economic inequalities This is more disturbing given the extreme economic disparity experienced by much of the black population the retreat from commitments to public ownership enshrined in the Freedom Charter the unambiguous safeguarding of private capital and the obstacles placed in the way of progressive economic policies by business interests and the entrenched apartheid era bureaucracy Rather than proposing a blueprint for a more equitable economic system this book presents the results and implications of detailed and wide ranging research on both the history and current dynamics of the South African economy from the Second World War to the present The authors analyze a range of strategic economic trajectories linking these to the shifting balance of economic and political power in South Africa But their approach is not prescriptive instead they set the parameters within which the economic and political debates are conducted They also discuss the theoretical arguments involved in the propositions that they and others have put forward The books value is enhanced by the comprehensiveness of the data presented and each chapter is self contained so that particular topics can be studied separately **South Africa and Nuclear Proliferation** J.D.L. Moore, 1987-06-18 South Africa's water governance hydraulic mission (1912-2008) in a WEF-Nexus context Johann W.N. Tempelhoff, 2018-12-01 Geologists physicists and ecologists currently promote the idea of

a post Holocene epoch the Anthropocene As a result of constant innovation and modernisation in the fields of engineering natural science management studies and environmental studies there has been a growing awareness of the intrinsic interaction between humankind and the environment Humankind has become part of the environmental dynamics to the extent that they are literally able to change ecosystems Nowhere is the impact more evident than in the anthropogenic engagement with the hydrosphere from the smallest pool of water to the earth's atmosphere Comprehensive infrastructure development in water and sanitation the growing trend to seek additional resources in the form of groundwater desalinated seawater and recycled wastewater as well as special attention being given to capturing and preserving rainwater bear evidence of a timely response to climate change population growth and rapid development in many water stressed regions of the world The purpose of the book is to provide a historical overview of the manner in which South Africa's water resources have been governed from a time when the Union of South Africa was formed in 1910 up to 2008 a time of a growing global awareness of the potential impact that climate change may have on water resources in a key region of southern Africa notable for increasing levels of aridity and more erratic rainfall patterns This focus on the history of water affairs in South Africa makes it possible for scholars to comprehend the contemporary transitions made in the country's water governance system since the establishment in 2014 of the Department of Water and Sanitation The focus is on the Water Energy Food nexus a strategy which holistically contemplates the governance and use of water from the perspective of the interconnection between water energy and food as resources

The Political Economy of Power Sector Reform David G. Victor, Thomas C. Heller, 2007-02-08 Over the last fifteen years the world's largest developing countries have initiated market reform in their electric power sectors from generation to distribution This book evaluates the experiences of five of those countries Brazil China India Mexico and South Africa as they have shifted from state dominated systems to schemes allowing for a larger private sector role As well as having the largest power systems in their regions and among the most rapidly rising consumption of electricity in the world these countries are the locus of massive financial investment and the effects of their power systems are increasingly felt in world fuel markets This accessible volume explains the origins of these reform efforts and offers a theory as to why despite diverse backgrounds reform efforts in all five countries have stalled in similar ways The authors also offer practical advice to improve reform policies

The Oxford Handbook of the South African Economy Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021 This Handbook provides a detailed and wide ranging coverage of the key economic questions in South Africa concentrating on the more recent economic challenges facing the country

Empire and Globalisation Gary B. Magee, Andrew S. Thompson, 2010-02-11 Focusing on the great population movement of British emigrants before 1914 this book provides a perspective on the relationship between empire and globalisation It shows how distinct structures of economic opportunity developed around the people who settled across a wider British World through the co ethnic networks they created Yet these networks could also limit and distort economic growth The powerful appeal of

ethnic identification often made trade and investment with racial outsiders less appealing thereby skewing economic activities toward communities perceived to be British By highlighting the importance of these networks to migration finance and trade this book contributes to debates about globalisation in the past and present It reveals how the networks upon which the era of modern globalisation was built quickly turned in on themselves after 1918 converting racial ethnic and class tensions into protectionism nationalism and xenophobia Avoiding such an outcome is a challenge faced today

South Africa and the World Economy William G. Martin, 2013 Once an international pariah South Africa has emerged as a respected and influential African state projecting its economic and political power across the continent South Africa and the World Economy Remaking Race State and Region chronicles the volatile history of this resurgence from the nation's rise as an industrialized white state and subsequent decline as a newly underdeveloping country to its current standing as a leading member of the Global South Contrasting with much of the latest scholarship which examines South Africa as a discrete national case this volume places the country in the global social system analyzing its relationships with the colonial powers and white settlers of the early twentieth century the costs of the neoliberal alliances with the North and the more recent challenges from the East This approach offers a bold reinterpretation of South Africa's developmental successes and failures over the last century as well as clear yet contentious lessons for the present Publisher description

Being Nuclear Gabrielle Hecht, 2012-03-02 The hidden history of African uranium and what it means for a state an object an industry a workplace to be nuclear Uranium from Africa has long been a major source of fuel for nuclear power and

atomic weapons including the bomb dropped on Hiroshima In 2003 after the infamous yellow cake from Niger Africa suddenly became notorious as a source of uranium a component of nuclear weapons But did that admit Niger or any of Africa's other uranium producing countries to the select society of nuclear states Does uranium itself count as a nuclear thing In this book Gabrielle Hecht lucidly probes the question of what it means for something a state an object an industry a workplace to be nuclear Hecht shows that questions about being nuclear a state that she calls nuclearity lie at the heart of today's global nuclear order and the relationships between developing nations often former colonies and nuclear powers often former colonizers Hecht enters African nuclear worlds focusing on miners and the occupational hazard of radiation exposure Could a mine be a nuclear workplace if as in some South African mines its radiation levels went undetected and unmeasured With this book Hecht is the first to put Africa in the nuclear world and the nuclear world in Africa By doing so she remakes our understanding of the nuclear age Ending Africa's Energy Deficit and the Law Yinka Omorogbe, Ada Ordor, 2018-02-22 With the inclusion of access to energy in the sustainable development goals the role of energy to human existence was finally recognized Yet in Africa this achievement is far from realized Omorogbe and Ordor bring together experts in their fields to ask what is stalling progress examining problems from institutions catering to vested interests at the continent's expense to a need to develop vigorous financial and fiscal frameworks The ramifications and complications of energy law are labyrinthine this volume discusses how energy deficits can burden disabled people women and children in excess of their more fortunate counterparts as well as considering environmental issues including the delicate balance between the necessity of water for drinking and cleaning and the use of water in industrial processes A pivotal work of scholarship the book poses pressing questions for energy law and international human rights *A Commonwealth of Knowledge* Saul Dubow, 2006-10-19 This is the first full study of the relationship of knowledge to national identity formation in modern South Africa It explores how the cultivation of knowledge served to support white political ascendancy and claims to nationhood Elegantly written and wide ranging the book addresses major themes in both South African and comparative imperial historiography **Historical Dictionary of South Africa** Christopher Saunders, Peter Limb, 2020-12-15 As the most influential and powerful country on the entire continent of Africa an understanding of South Africa's past and its present trends is crucial in appreciating where South Africans are going to and from where they have come South Africa changed dramatically in 1994 when apartheid was dismantled and it became a democratic state Since 2000 when the previous edition appeared further big changes occurred with the rise of new political leaders and of a new black middle class There were also serious problems in governance in public health and the economy but with a remarkable popular resilience too This third edition of Historical Dictionary of South Africa contains a chronology an introduction and an extensive bibliography The dictionary section has more than 600 cross referenced entries on important personalities as well as aspects of the country's politics economy foreign relations religion and culture This book is an excellent resource for students

researchers and anyone wanting to know more about South Africa **Transforming Power** Aynsley Kellow, 1996 Originally published in 1996 this book is an exploration and analysis of the electricity industry in the context of uncertainty following the energy crisis of the 1970s and concern over the greenhouse effect Few industries demand a similar level of foresight and planning or such vast amounts of capital The book examines five well known Australian Canadian and New Zealand cases and closely analyses the ways in which various agencies have sought ends to serve the means at their disposal Electricity has long been regarded as a natural monopoly but questions of privatisation regulation and government control are increasingly prevalent The book explores these issues and also notes the experiences of other countries in its analysis of institutional reform Aynsley Kellow argues for different approaches to electricity planning which offer much by way of economic savings and minimisation of environmental problems *Eskom* Sylvy Jaglin, Alain Dubresson, 2016-08-16 Africa's leading producer of electricity Eskom Holdings SOC Ltd is also a vertically integrated monopoly owned by the South African state This national champion was shaken in 2008 when it was obliged to introduce load shedding or rolling blackouts and again in late 2014 Trying to understand how and why one of the iconic pillars of South African state capitalism is now in distress the authors of this book argue that the so called electricity crisis is in fact a public monopoly crisis Moving beyond technical aspects they explore the relationship between state power and Eskom before during and after apartheid From this perspective they suggest that the current technical and financial troubles of this public utility are illustrative of the weakening of its technopolitical regime of how national institutions have governed Eskom's technological development and of the pursuit of political goals in the production of electrical power Without a clear industrial strategy during the 2000s Eskom became a powerful tool of Broad Black Economic Empowerment as well as a neopatrimonial system which generates profits captured by the ruling party As a result crisis in Eskom shakes the whole political edifice Inefficient and its finances increasingly under scrutiny this state owned enterprise's existence as a monopolistic public utility is regularly a subject of debate The authors discuss the ambivalent role of Eskom in the national energy transition policy and whether solutions point in the direction of de-integrating this public monopoly and allowing its current technopolitical regime to enter a planned or natural decline

A Just Transition to a Low Carbon Future in South Africa Nqobile Xaba, Saliem Fakir, 2022-02-01 Deliberations on the just transition in South Africa have intensified and will continue to do so for the next few years and decades Climate change widening socio-economic inequality the precarious future of work and emergent approaches to financing arrangements have brought new urgency to the issues It therefore remains critical to interrogate how South Africa can ensure a just transition to a low carbon economy This book underlines the fact that the low carbon transition in South Africa has to grapple with complex historical social economic cultural and political factors The main message is that the transition to a low carbon society is possible but it can only succeed if it is just and handled collaboratively In addition the book aims to broaden the discourse on low carbon transition and explore the opportunities in and impediments to making the transition

fair affordable and socio economically viable *Media Primitivism* Delinda Collier,2020-09-18 Delinda Collier finds alternative concepts of mediation in African art by closely engaging with electricity based works since 1944 *Technologies of Power* Michael Thad Allen,Gabrielle Hecht,2001-05-25 This collection explores how technologies become forms of power how people embed their authority in technological systems and how the machines and the knowledge that make up technical systems strengthen or reshape social political and cultural power The authors suggest ways in which a more nuanced investigation of technology s complex history can enrich our understanding of the changing meanings of modernity They consider the relationship among the state expertise and authority the construction of national identity changes in the structure and distribution of labor political ideology and industrial development and political practices during the Cold War The essays show how insight into the technological aspects of such broad processes can help synthesize material and cultural methods of inquiry and how reframing technology s past in broader historical terms can suggest new directions for science and technology studies The essays were written in honor of Thomas Parke Hughes and Agatha Chipley Hughes whose spirit of inquiry they seek to continue Contributors Janet Abbate Michael Thad Allen W Bernard Carlson Gabrielle Hecht Erik P Rau Eric Schatzberg Amy Slaton John Staudenmaier Edmund N Todd Hans Weinberger *Varieties of Capitalism Over Time* Niall G. Mackenzie,Andrew Perchard,Christopher Miller,Neil Forbes,2022-12-12 This book looks at how varieties of capitalism emerge over time and across different geographies and is comprised of submissions from scholars around the globe Covering a wide range of territories including Europe the Americas Africa and Asia across both the nineteenth and twentieth centuries this edited volume considers the roles that the state and business working together play in the emergence of different economic systems Whilst most analyses focus on identifying different types of capitalism the chapters in this volume instead focus on how these different types develop the drivers of their emergence and the people and organisations behind the developments The geographical spread of analyses allows the reader to delve into how different countries have managed and even created their economic systems providing comparative insights into our understanding of how different national economic models develop over time This book was originally published as a special issue of Business History
