

# What Other Information Might Electromagnetic Waves Provide?

- By studying the shift of color of the light from stars, astronomers discovered a planet revolving around an ordinary star like our sun.
- Since this first discovery, more than 300 planets have been discovered around other stars.
- The discovery of new planets brings up the question of whether there is life in other solar systems.

**3. Make a Hypothesis** How might electromagnetic waves help scientists discover life on other planets?
