Ultrafast Phenomena in Molecular Sciences Rebeca de Nalda, Luis Bañares, 2013-10-22 This book presents the latest developments in Femtosecond Chemistry and Physics for the study of ultrafast photo induced molecular processes. Molecular systems from the simplest H₂ molecule to polymers or biological macromolecules constitute central objects of interest for Physics, Chemistry and Biology and despite the broad range of phenomena that they exhibit they share some common behaviors. One of the most significant of those is that many of the processes involving chemical transformation, nuclear reorganization, bond breaking and bond making take place in an extraordinarily short time in or around the femtosecond temporal scale (1 fs to 15 s). A number of experimental approaches, very particularly the developments in the generation and manipulation of ultrashort laser pulses coupled with theoretical progress provide the ultrafast scientist with powerful tools to understand matter and its interaction with light at this spatial and temporal scale. This book is an attempt to reunite some of the state of the art research that is being carried out in the field of ultrafast molecular science from theoretical developments through new phenomena induced by intense laser fields to the latest techniques applied to the study of molecular dynamics.

The Encyclopedia of Mass Spectrometry Michael L. Gross, Richard Caprioli, 2006-12-21 Volume 6 Ionization Methods captures the story of molecular ionization and its phenomenal evolution that makes mass spectrometry the powerful method it is today. Chapters 1 and 2 cover fundamentals and various issues that are common to all ionization e.g. accurate mass, isotope clusters and derivatization. Chapters 3-9 acknowledge that some ionization methods are appropriate for gas phase molecules and others for molecules that are in the solid or liquid states. Chapters 3-6 cover gas phase molecules, dividing the subject into 1) ionization of gas phase molecules by particles e.g. EI; 2) ionization by photons; 3) ionization by ion molecule and molecule-molecule reactions e.g. APCI and DART; and ionization in Strong electric fields i.e. Electrohydrodynamic and Field Ionization. Desorption Ionization in a Strong Electric Field illustrates the transition to ionization of molecules in the solid or liquid states covered in Chapters 7-9. 1 spray methods for ionization e.g. electrospray; 2 desorption ionization by particle bombardment e.g. FAB; and 3 desorption by photons e.g. MALDI. Electrospray and MALDI also
