**Secret Gardens, Satanic Mills** Mary Jo Maynes, Birgitte Søland, Christina Benninghaus, 2005 Essays on the history of girlhood in modern Europe

The Sigiriya Royal Gardens Nilan Cooray, 2012-10-19 Besides the efforts that are of a descriptive and celebrative nature studies related to Sri Lanka's historical built heritage largely view material remains in historical sociological socio historical and semiological perspectives There is hardly any serious attempt to view such material remains from a technical analytical approach to understand the compositional aspects of their design The 5th century AC royal complex at Sigiriya is no exception in this regard The enormous wealth of information and the material remains unearthed during more than 100 years of field based research by several generations of archaeologists provide an ideal opportunity for such analysis The Sigiriya Royal Gardens fills the gap in research related to Sri Lanka's historical built heritage in general and to Sigiriya in particular Therefore the present research attempts to read Sigiriya as a landscape architectonic design to expose its architectonic composition and design instruments

**The Power of Culture** Richard Wightman Fox, T. J. Jackson Lears, 1993-04 We are in the midst of a dramatic shift in sensibility and cultural history is the rubric under which a massive doubting and refiguring of our most cherished historical assumptions is being conducted Many historians are coming to suspect that the idea of culture has the power to restore order to the study of the past Whatever its potency as an organizing theme there is no doubt about the power of the term culture to evoke and stand for the depth of the re examination not taking place At a time of deep intellectual disarray culture offers a provisional nominalist version of coherence whatever the fragmentation of knowledge however centrifugal the spinning of the scholarly wheel culture which even etymologically conveys a sense of safe nurture warm growth budding or ever present wholeness will shelter us The PC buttons on historians' chests today stand not for politically correct but positively cultural from the Introduction More and more scholars are turning to cultural history in order to make sense of the American past This volume brings together nine original essays by some leading practitioners in the field The essays aim to exhibit the promise of a cultural approach to understanding the range of American experiences from the seventeenth century to the present Expanding on the editors pathbreaking The Culture of Consumption the contributors to this volume argue for a cultural history that attends closely to language and textuality without losing sight of broad configurations of power that social and political history at its best has always stressed The authors here freshly examine crucial topics in both private and public life Taken together the essays shed new light on the power of culture in the lives of Americans past and present

**Great Dames** Elspeth Cameron, Janice Dickinson, 1997-01-01 This book elucidates the lives and achievements of several Canadian women from different walks of life

**Diversity and Classification of Flowering Plants** Armen Leonovich

Takhtadzhian, 1997 The culmination of more than fifty years of research by the foremost living expert on plant classification Diversity and Classification of Flowering Plants is an important contribution to the field of plant taxonomy In the last decade the system of classifying plants has been thoroughly revised Instead of describing every individual family Takhtajan includes descriptions in keys to families which he calls descriptive keys The advantage of descriptive keys is that they give both the characteristic features of the families and their differences The delimitation of families and orders drastically differs from the one accepted by the Englerian school and from the one accepted in Arthur Cronquist's system Takhtajan favors the smaller more natural families and orders which are more coherent and better defined where characters are easily grasped and which are more suitable for information retrieval and phylogenetic studies including cladistic analysis because it reduces polymorphic codings
