*The Book of Gardening Projects for Kids* Whitney Cohen, John Fisher, 2012-01-01 Features gardening advice including how to design a play friendly garden ideas for fun filled theme gardens and how to cook and preserve the garden's bounty

*Climate Change: You, And Your Garden* Andrew M Molloy, Climate Change You and your Garden Climate change has become such a common word these days that we can fall into the trap of misunderstanding its importance as gardeners and in our lives in general This general guide will help show you how your garden can help with climate change How you can add features and plants that will contribute to a user friendlier garden and how to create a more bio diverse garden to help the decline in plant insect and mammal species This book also contains some general information on climate change and how it is affecting You and Your garden The world we all share is changing and we do as gardeners need to adapt and change with the climate we all now face Your garden is yours to do as you wish so why not help the planet and also create a place for your local wildlife

Climate Crisis: You & Your Garden Andrew M Molloy, 2022-12-26 There are many issues and obstacles we face today We know we all need to start somewhere and that somewhere could be right outside your front or back door Our need to change is now not tomorrow There is not a single environment on the entire Earth that is not now contaminated by human activity This will continue until our biosphere can take no more Then we all lose We lose a diamond that may never

exist again in any other solar system amongst billions We are still abusing fossil fuels and the simple truth is if we continue to pump greenhouse gases into our atmosphere if we deforest anymore land continue to build and extract anymore minerals from the Earth we will cook this planet to the point no life can exist Our very survival depends on our ability to change the way we live and that day is here right now So much wildlife is being lost across the globe and nearly all that loss can be attributed to human activity Your local wildlife should be important to you and you should want to help because that unseen life those plants and creatures have all contributed to our lives in ways we are yet to fully appreciate We can do so much more to help We can grow many seasonal foods We can do more than you think if the will is strong to do so My passion for wildlife is stronger now than at any time in my life The reason for that is because I know that the natural world needs me and all of you more than at any time in all of its evolutionary path We are breaking down chains of life that can recover if we act now We can reverse climate change but we all do need to act and not for no other reason that because you like me you care about our planet If this book gives you anything I hope it gives you a new perspective on how your garden is just as important as saving our oceans our forests and our kaleidoscope of magical plants and creatures we are custodians of If enough of us care I know the future can be brighter for all and not just the few I have included some fun facts in this book and a month by month gardening guide I have compiled over three decades of gardening There are fun ways to reuse materials to save them from landfill Projects that are easily achieved to save money or to simply grow more of your own food to save a few bucks pounds In truth your garden can be anything you want it to be All the projects in this book are from my own endeavours in my garden to create a place for me the food I like to grow for and the local wildlife
