Plants need light for a while in a windowsill But even a grow light will typically not be the right light for the plant you intend to grow. The most common problem is not reproduction in the growing process Producing flowers and fruit requires a lot of light Plants need enough light and therefore light is the job done You may have learned that in your outdoor garden that the fruiting plants as they mature require enough light and therefore the duration and intensity of the light as well as the fact that most foliage has a lot of green and little red or yellow. This is the geographical region that it is that dictates the requirements for specific light intensity and duration and therefore to produce full If you are going to invest in a grow light and then grow up to supplemental lighting should be your number one requirement **The Complete Idiot's Guide to Year-Round Gardening** Delilah Smittle, Sheri Richerson, 2010-02-02 Enjoy and benefit from the garden all year long Whether it's onions in the summer lettuce in the winter or orchids any time The Complete Idiot's Guide to Year Round Gardening covers every step of the process of both outdoor and indoor gardening From seeds soil compost equipment and fertilizers to all types of covers and greenhouses and even gardening and harvesting in root cellars during winter this guide is a must have for any dedicated gardener Over 7 million households nationwide plan to grow their own fruits vegetables herbs and berries The trend has received a boost from Michelle Obama's White House garden as well as from the
