Gardens And Gardening In Papal Rome:

Gardens and Gardening in Papal Rome David R. Coffin, 1991 From the late Middle Ages when it embodied spirituality through the end of the eighteenth century when it offered pleasurable surroundings for banquets poetry readings and amorous pursuits the garden figured prominently in everyday Roman life In this lavishly illustrated history David Coffin provides a wealth of information on how Italian gardeners worked with the elements of color fragrance sound shade architecture sculpture and wildlife to achieve a wide variety of sensual effects In so doing he presents the stages of evolution in classic Italian gardening which was replaced in the late eighteenth century by the more naturalistic English style Coffin first considers the role of cloistered gardens in the Middle Ages and shows how they were later incorporated as private spaces within the larger Renaissance gardens Describing the introduction of sculptural collections and waterworks into gardens during the sixteenth century he explores some of the rich often complicated iconographical programs that emerged The extension of garden parks in the seventeenth century marks the diminishment of architecture in landscaping and the advent of landscape design as a dominant factor Throughout this book Coffin concentrates on the garden as a site for entertainment and on the development of design components that eventually permitted gardens to be freely open to the public

Perspectives on Garden Histories Michel Conan, 1999 Garden history is a discipline of contested purposes *Perspectives on Garden Histories* contributes to a self critical examination of this emergent field of study at the same time offering an overview of its main achievements in several domains such as Italian and Mughal gardens and of the new kinds of investigation to which they have led In its early years garden history centered on architectural studies of garden design but in the 1960s the emphasis shifted from garden design to garden meaning The new paradigm considered gardens as complex

works of art and demanded an extensive documentation of the historical context as well as of the figurative and discursive sources This approach in its turn was challenged by neo Marxist scholars who proceeded to view landscape appreciation as an ideological superstructure an outgrowth of agricultural production processes Garden designs and their histories can also be viewed as expressions of ideological conflicts in society Neither gardens nor their history can thus be studied independently of the social cultural and political movements that give prominence to the contested ideologies Gardens can be used to foster some ideologies or reflect a reaction against a social change Comparative research offers another fascinating approach exploring the relations between European landscape concepts and other cultural contexts and discussing issues of cultural dominance and interpretation The emergence of various perspectives has led to the incorporation of further questions into the domain of garden studies which has been moving in new directions and using new methods in search of an adapted theoretical framework This volume offers a striking view of changes taking place in the discipline

Gardens and Academies in Early Modern Italy and Beyond Denis Ribouillault, 2024-10-21 This collection of essays explores the role of gardens in early modern academies and conversely the place of what might be called academic culture in early modern gardens While studies of botanical gardens have often focused on their association with a research institution the intention of this book is deliberately broader seeking to explore the interconnections between the built environment of the early modern garden and the more or less organised social and intellectual life it supported As such the book contributes to the intersection of several fields of research garden history literary history architectural history and socio political history and considers the garden as a site of performance that requires an intermedial approach

The Poem and the Garden in Early Modern England Deborah Solomon, 2022-12-30 This book draws attention to the pervasive artistic rivalry between Elizabethan poetry and gardens in order to illustrate the benefits of a trans media approach to the literary culture of the period In its blending of textual studies with discussions of specific historical patches of earth The Poem and the Garden demonstrates how the fashions that drove poetic invention were as likely to be influenced by a popular print convention or a particular garden experience as they were by the formal genres of the classical poets By moving beyond a strictly verbal approach in its analysis of creative imitation this volume offers new ways of appreciating the kinds of comparative and competitive methods that shaped early modern poetics Noting shared patterns both conceptual and material in these two areas not only helps explain the persistence of botanical metaphors in sixteenth century books of poetry but also offers a new perspective on the types of contrastive illusions that distinguish the Elizabethan aesthetic With its interdisciplinary approach The Poem and the Garden is of interest to all students and scholars who study early modern poetics book history and garden studies

which cardinalate courts played a key part in Rome's resurgence and acted as hubs of knowledge located on the fault lines of politics and reform in church and state hospitable spaces that can be analysed in the context of entanglements in Florentine and Roman cultural and political patronage and intersections between the princely court and a more professional and complex knowledge and practice of household management in the consumer and service economy of early modern Rome. Based on an array of archival sources and on three treatises whose authors were closely linked to Ridolfi's court this monograph explores these multidisciplinary intersections to allow the more traditional fields of church and political history to be approached from different angles. Niccolò Ridolfi and the Cardinal's Court will appeal to all those interested in the organisation of these elite establishments and their place in sixteenth century Roman society the life and patronage of Niccolò Ridolfi in the context of the Florentine exiles who desired a return to republicanism and the history of the Roman Catholic Church.

[A Companion to Early Modern Rome, 1492-1692](#), 2019-02-04 Winner of the 2020 Bainton Prize for Reference Works. This volume edited by Pamela M Jones, Barbara Wisch and Simon Ditchfield focuses on Rome from 1492-1692, an era of striking renewal. Demographic, architectural, intellectual and artistic Rome's most distinctive aspects including its twin governments, civic and papal, unique role as the seat of global Catholicism, disproportionately male population and status as artistic capital of Europe are examined from numerous perspectives. This book of 30 chapters intended for scholars and students across the academy fills a noteworthy gap in the literature. It is the only multidisciplinary study of 16th and 17th century Rome that synthesizes and critiques past and recent scholarship while offering innovative analyses of a wide range of topics and identifying new avenues for research. Committee's statement: The volume includes a multidisciplinary study of early modern Rome by focusing on the 16th and 17th centuries by re-examining traditional topics anew. This volume will be of tremendous use to scholars and students because its focus is very well conceptualized and organized while still covering a breadth of topics. The authors celebrate Rome's diversity by exploring its role not only as the seat of the Catholic church but also as home to large communities of diplomats, printers and working artisans, all of whom contributed to the city's visual material and musical cultures.
