Gary Hill Gary Hill,2002 *Gary Hill. Selected Works.* Holger Broeker,2002-03 *Video Yvonne*

Spielmann,2010-08-13 An argument that video is not merely an intermediate stage between analog and digital but a medium in its own right traces the theoretical genealogy of video and examines the different concepts of video seen in works by Vito Acconci Ulrike Rosenbach Steina and Woody Vasulka and others Video is an electronic medium dependent on the transfer of electronic signals Video signals are in constant movement circulating between camera and monitor This process of simultaneous production and reproduction makes video the most reflexive of media distinct from both photography and film in which the image or a sequence of images is central Because it is processual and not bound to recording and the appearance of a frame video shares properties with the computer In this book Yvonne Spielmann argues that video is not merely an intermediate stage between analog and digital but a medium in its own right Video has metamorphosed from technology to medium with a set of aesthetic languages that are specific to it and current critical debates on new media still need to recognize this Spielmann considers video as transformation imagery acknowledging the centrality in video of the transitions between images and the fact that these transitions are explicitly reflected in new processes After situating video in a genealogical model that demonstrates both its continuities and discontinuities with other media Spielmann considers three strands of video praxis documentary experimental art and experimental image making which is concerned primarily with signal processing She then discusses selected works by such artists as Vito Acconci Ulrike Rosenbach Joan Jonas Nam June Paik Peter Campus Dara Birnbaum Nan Hoover Lynn Hershman Gary Hill Steina and Woody Vasulka Bill Seaman and others These works serve to demonstrate the spectrum of possibilities in video as medium and point to connections with other forms of media Finally Spielmann discusses the potential of interactivity complexity and hybridization in the future of video as a medium **Video Art Theory** Helen Westgeest,2015-06-15 *Video Art Theory A Comparative Approach*

demonstrates how video art functions on the basis of a comparative media approach providing a crucial understanding of video as a medium in contemporary art and of the visual mediations we encounter in daily life A critical investigation of the visual media and selected video artworks which contributes to the understanding of video as a medium in contemporary art The only study specifically devoted to theorizing the medium of video from the perspective of prominent characteristics which result from how video works deal with time space representation and narrative The text has emerged out of the author's own lectures and seminars on video art Offers a comparative approach which students find especially useful offering new perspectives *Aesthetic Animism* David Jhave Johnston,2016-06-03 A poetics appropriate to the digital era that connects digital poetry to traditional poetry's concerns with being This book offers a decoder for some of the new forms of poetry enabled by digital technology Examining many of the strange technological vectors converging on language it proposes a poetics appropriate to the digital era while connecting digital poetry to traditional poetry's concerns with being a k a
