Smith, 1990 **Biotechnology for Fuels and Chemicals** Mark Finkelstein, Brian H. Davison, 2012-12-06 MARK FINKELSTEIN National Renewable Energy Laboratory BRIAN H DAVISON Oak Ridge National Laboratory The proceedings of the 19th symposium on Biotechnology for Fuels and Chemicals held in Colorado Springs Colorado May 4 8 1997 had over 200 attendees This meeting continues to provide a unique forum for the presentation of new applications and recent research advances in the production of fuels and chemicals through biotechnology The utilization of renewable resources and in particular cellulosic biomass has broad implications in today's world of green house gases global warming ozone layers climate change energy sustainability and carbon emissions It also has relevance to the chemical industry's continuing need to both lower current chemical production costs and produce novel chemicals Biotechnology and bioprocessing are now making it possible to convert this biomass to fuels and chemicals in a commercially attractive fashion The 19th Symposium captures a wide range of technical topics from an academic industrial or government perspective A variety of biomass feedstocks are discussed in Session 1 along with several updated and innovative pretreatment processing approaches The ability to turn lignocellulosic materials into simple sugars offers great opportunities to generate cost effective feed stocks to be used in biotechnological processes for the production of fuels and chemicals Through the advent of genetic engineering the development of a series of exciting new biocatalysts and microbes were presented in Session 2 **Bioremediation Technologies** Robert L. Irvine, Subhas K. Sikdar, 1998-01-08 FROM THE INTRODUCTION This three volume series Bioremediation Principles and Practice provides state of the art description of advances in pollution treatment and reduction using biological means identify and address at a fundamental level broad scientific and technological areas that are unique to the subject or theme and that must be understood if advances are to be made and provide a comprehensive overview of new developments at the regulatory desk top bench scale pilot scale and full scale levels The series covers all media air water and soil sediment and blends the talents knowledge and know how of academic industrial governmental and international contributors The series addresses the removal of both hazardous and nonhazardous contaminants from the liquid solid and gas phase using biological processes This includes the biological treatment of wastes of municipal and industrial origin bioremediation of leachates soils and sediments and biofiltration for contaminated gases Fungi in Bioremediation G.
