This handbook provides an authoritative account of social work field education in the global south. It presents an overview of various aspects of theory and practice modules in the social work curriculum and advances in research in social work field education in the developing world through in-depth analyses and global case studies. Key features: Discusses critical issues and new directions in the theory and practice of social work field education; challenges in field work education; decolonising field work training; developing competent social work graduates; aligning fieldwork with cultural practices in indigenous communities; the idea of clinical social work; and a comparative analysis of social work field supervision. Integrates theory and practice of social work field education for students and teachers from diverse geographical and cultural contexts across the global south, including countries from South Asia and Asia, Africa, and Latin America, and the Caribbean, covering India, Bangladesh, Pakistan, Nepal, Sri Lanka, China, Georgia, Philippines, Turkey, Papua New Guinea, Eswatini, Republic of Trinidad and Tobago, Kenya, Nigeria, South Africa, Botswana, Chile, and Barbados. Brings together international comparative perspectives on field work education in social work from leading experts, social work educators, and social work professionals. This handbook will be an essential resource for scholars and researchers of social work, development studies, social anthropology, sociology, education, South Asian studies, and Global South studies. It will also be useful to educators and practitioners of social work in global institutions of higher studies, as well as civil society organisations.

Virtuality and Virtualization Kevin Crowston, Sandra Sieber, Eleanor Wynn, 2007-10-05. In today's rapidly changing global work environment, all workers experience increased organizational complexity. Companies are functionally distributed, many across the globe. Intense competition for markets and margins makes adaptiveness and innovation imperative. Information and communication technologies are pervasive and fundamental infrastructures; their use is deeply integrated into work processes. Workers collaborate electronically with co-workers or with employees of other companies. New boundaries of time-space, business unit culture, company partnerships, and software tools are driving the adoption of novel organizational forms. On a macro level, these changes have started to reshape society. This book considers possible frameworks for understanding virtuality and virtualization, ways of analyzing virtual work in terms of work processes, group processes within virtual teams, the role of knowledge in virtual settings, and other implications of the role of fiction in structuring virtuality.
