of the Prometheans David Sinclair, 2022-01-29 Did alien astronauts visit the ancient earth or were the real aliens the ancient humans themselves People today imagine that ancient humans were just like us but at a more primitive stage of development In fact ancient humans were nothing like us They had incredible abilities superpowers that we have now lost We discarded them in the course of becoming modern conscious humans but these superpowers still lie latent in all of us and can be recovered in the right circumstances The ancient humans were the Prometheans bridging the gap to the gods and supremely well versed in carrying the divine fire They knew the secrets of the gods Isn't it time to regain all of their lost knowledge and power **In Search of the Classic** Steven Shankman, 2010-11 The classical Steven Shankman argues

should not be confused with a particular historical period of Western antiquity although it may owe its original articulation to the literary and philosophical explorations of ancient Greek authors Shankman's book searches for and attempts to formulate the shape of the continuing presence as embodied in particular literary works mainly from Western antiquity and the neoclassical and modern periods of what the author calls a classical understanding of literature For Shankman literature defined from a classical perspective is a coherent compelling and rationally defensible representation that resists being reduced either to the mere recording of material reality or to the bare exemplification of an abstract philosophical precept He derives his definition largely from his reading of Greek literature from Homer through Plato from the history of literary criticism and from the Greco Roman tradition in English American and French literature Shankman reveals unsuspected yet convincing connections among authors of such widely disparate times and places His idea of the classic that authorizes these connections is presented as normative thus making possible the evaluation of literary works and in turn forthright discussion of what constitutes the literary as distinct from other kinds of discourse Shankman's study runs counter to a strong tendency

of contemporary criticism that argues precisely against any distinct category of the literary. He offers a series of interpretations that cumulatively advance theoretical discussion by challenging scholars to rethink the critical paradigms of postmodernism. At the center of the book is a discussion of the quintessentially classic Valéry poem *Le Cimetière marin* and the classic qualities it shares with Pindar's third Pythian ode from which Valéry derives the epigraph for his poem. **The Gates of Horn and Ivory** Anne Amory, 1966* *Northrop Frye on Milton and Blake* Northrop Frye, 2005-01-01 Angela Esterhammer, a student of Frye's in the 1980s, has provided annotation and an introduction that demonstrates the poet's importance for Frye's literary and cultural criticism and provides a twenty-first-century perspective on the legacy of his work.

The Stairway to Consciousness Dr. Thomas Stark, Come and discover the extraordinary story of how consciousness is born from the unconscious. This is the story of existence. This is the story of the meaning of life, the universe, and everything. Everything conscious has the unconscious for a mother. To exist is to live, to have a mind, and to think. As we see in our dreams, thinking can produce outer worlds which we imagine are external to us but are just our own constructs. We are all part of a living cosmic organism seeking to optimize itself, to perfect itself. The Cosmic Mind produces a Cosmic World in which Mind can contend with its own construct and come to consciousness via all the problems and struggles it encounters there. We are alienated from the world because we fail to understand that we unconsciously created it. Only consciousness can reveal the truth that everything is made by us; that we have total control over it if we put our mind to it. Minds and their thoughts are all that exist. There is nothing else. **The Aeneid** Virgil, 2010-12-28 From the award-winning translator of *The Iliad* and *The Odyssey* comes a brilliant new translation of Virgil's great epic. Fleeing the ashes of Troy, Aeneas, Achilles' mighty foe in the *Iliad*, begins an incredible journey to fulfill his destiny as the founder of Rome. His voyage will take him through stormy seas, entangle him in a tragic love affair, and lure him into the world of the dead itself, all the while tormented by the vengeful Juno, Queen of the Gods. Ultimately, he reaches the promised land of Italy, where, after bloody battles and with high hopes, he founds what will become the Roman empire. An unsparing portrait of a man caught between love, duty, and fate, the *Aeneid* redefines passion, nobility, and courage for our times. Robert Fagles, whose acclaimed translations of Homer's *Iliad* and *Odyssey* were welcomed as major publishing events, brings the *Aeneid* to a new generation of readers, retaining all of the gravitas and humanity of the original Latin as well as its powerful blend of poetry and myth. Featuring an illuminating introduction to Virgil's world by esteemed scholar Bernard Knox, this volume lends a vibrant new voice to one of the seminal literary achievements of the ancient world. been central to so much of human thought From prehistoric cave drawings in Europe and ancient rock art in Africa and India to burning pyres of confiscated tusks our thoughts about elephants tell a story of human history In *Elephant Trails* Nigel Rothfels argues that over millennia we have made elephants into both monsters and miracles as ways to understand them but also as ways to understand ourselves Drawing on a broad range of sources including municipal documents zoo records museum collections and encounters with people who have lived with elephants Rothfels seeks out the origins of our contemporary ideas about an animal that has been central to so much of human thought He explains how notions that have been associated with elephants for centuries that they are exceptionally wise deeply emotional and have a special understanding of death that they never forget are beloved of the gods and suffer unusually in captivity and even that they are afraid of mice all tell part of the story of these amazing beings Exploring the history of a skull in a museum a photograph of an elephant walking through the American South in the early twentieth century the debate about the quality of life of a famous elephant in a zoo and the accounts of elephant hunters Rothfels demonstrates that elephants are not what we think they are and they never have been *Elephant Trails* is a compelling portrait of what the author terms our elephant

Through the Daemon's Gate Dean Swinford, 2013-10-08 This book tells the story of the early modern astronomer Johannes Kepler's *Somnium* which has been regarded by science historians and literary critics alike as the first true example of science fiction Kepler began writing his complex and heavily footnoted tale of a fictional Icelandic astronomer as an undergraduate and added to it throughout his life The *Somnium* fuses supernatural and scientific models of the cosmos through a satirical defense of Copernicanism that features witches lunar inhabitants and a daemon who speaks in the empirical language of modern science Swinford's looks at the ways that Kepler's *Somnium* is influenced by the cosmic dream a literary genre that enjoyed considerable popularity among medieval authors including Geoffrey Chaucer Dante John of Salisbury Macrobius and Alan of Lille He examines the generic conventions of the cosmic dream also studying the poetic and theological sensibilities underlying the categories of dreams formulated by Macrobius and Artemidorus that were widely used to interpret specific symbols in dreams and to assess their overall reliability Swinford develops a key claim about the form of the *Somnium* as it relates to early science Kepler relies on a genre that is closely connected to a Ptolemaic or earth centered model of the cosmos as a way of explaining and justifying a model of the cosmos that does not posit the same connections between the individual and the divine that are so important for the Ptolemaic model In effect Kepler uses the cosmic dream to describe a universe that cannot lay claim to the same correspondences between an individual's dream and the order of the cosmos understood within the rules of the genre itself To that end Kepler's *Somnium* is the first example of science fiction but the last example of Neoplatonic allegory Gates of Horn and Ivory. Oxford English Texts Complete Works of Oscar Wilde is the first variorum edition of Wilde's major critical writing it includes the critical essays which were re-published in book form in his life time that is those anthologised in *Intentions* and *The Soul of Man* as well as his graduate essay usually known by the title *The Rise of Historical Criticism* but which this volume titles *Historical Criticism* The Introduction gives a detailed account of the composition of each of the essays it gives a new explanation for the relationship between the *The Decay of Lying* and *Pen, Pencil and Poison* arguing that they are best understood as companion pieces it provides the first concrete demonstration that Wilde did on occasions knowingly copy his own work and it reveals that substantial cuts were made to some of Wilde's essays without his full consent by the periodical editors with whom he worked The edition also provides for the first time a full collation of the textual variants between the published versions of Wilde's essays that is both book and periodical and all extant manuscripts in addition it establishes a new authoritative text for *Historical Criticism* based on an examination of the original manuscript which differs significantly from that printed by Robert Ross in his 1908 *Collected Edition* and subsequently reprinted in the *Collins Complete Works* The annotation to the edition reveals the full extent of Wilde's borrowings both from his own work and from other writers it also reveals that much of *Historical Criticism* is in fact paraphrasing or translating well known classical texts and that the some of denseness of the argument is due to ellipses in Wilde's text that were disguised by earlier editors

African American Writers & Classical Tradition William W. Cook, James Tatum, 2024-05-31 Constraints on freedom of education and individual dignity have always been fundamental in determining who is able to write when and where Considering the singular experience of the African American writer William W. Cook and James Tatum here argue that African American literature did not develop apart from canonical Western literary traditions but instead grew out of those literatures even as it adapted and transformed the cultural traditions and religions of Africa and the African diaspora along the way Tracing the interaction between African American writers and the literatures of ancient Greece and Rome from the time of slavery and its aftermath to the civil rights era and on into the present the authors offer a sustained and lively discussion of the life and work of Phillis Wheatley, Frederick Douglass, Ralph Ellison and Rita Dove among other highly acclaimed poets, novelists and scholars Assembling this brilliant and diverse group of African American writers at a moment when our understanding of classical literature is ripe for change the authors paint an unforgettable portrait of our own reception of classic writing especially as it was inflected by American racial politics
