Modernising Social Policy for the New Life Course OECD,2007-12-06 This seminar proceedings examines whether The fundamental policy question addressed in the seminar was whether the current designs of social protection systems in OECD societies are well suited to contemporary life course realities **Core Values in American**

Life Arthur G. Neal,Helen Youngelson-Neal,2014-05-23 What values do Americans hold dear What happens when real world situations cause those values to conflict To better understand the intellectual map of how American society works Arthur G Neal and Helen Youngelson Neal analyze values prominent in American word and deed These values appear in our nation s formal documents rights and privileges prominently emphasized in the US Constitution and inscribed on the Statue of Liberty They have shaped the historical destiny and indeed include those values most extensively propagated by the general population Using these criteria the authors identify individualism the pursuit of happiness freedom consumerism materialism equality of opportunity technology mastery of the environment quality of marriage and national unity as the core American values Core values provide the raw materials for the construction of contemporary society as a moral community wherever that community is located Such values are clusters of ideas that are central to self identities they generate a sense of collective belonging and membership As such core values define the existing social order and advance a set of ideas for depicting a desirable future The analysis presented here helps us understand contemporary conflicts inherent in the American value system and the problems confronted by Americans as they try to live within the limitations and contradictions of value systems **Authors and the World** Rebecca Braun,2022-07-14 Authors and the World traces how four core modes

of authorship have developed and inflect one another in modern Germany through a series of twenty different case studies including the work of Thomas Mann Günter Grass Anna Seghers Walter H iller Felicitas Hoppe and Katja Petrowskaja and original interview material with contemporary writers Ulrike Draesner Olga Martynova and Ulrike Almut Sandig Modes of authorship are attitudes taken towards being an author that can be seen both in what an individual author does and in how a particular literary tradition or trend is perceived and mediated by others both within and beyond Pierre Bourdieu's literary field Consequently they deliberately straddle questions of literary production and reception Rebecca Braun sets out how the commemorative celebratory utopian and satirical modes interact with one another to produce a number of models of authorship that carry either foundational or otherwise normative force for society In varying combinations and with deep roots in 19th and early 20th century practices the four modes of authorship create a remarkably and at times troublingly stable German literature network that to a large degree still determines the way contemporary German speaking authors enact their cultural significance in their writing engage with their local circumstances and are more broadly received around the world Authors and the World provides not just a radically new approach to German literary history but a thoroughly new paradigm for thinking about literary authorship Thomas D.
