With his Letter of 1493 to the court of Spain Christopher Columbus heralded his first voyage to the present day Americas creating visions that seduced the European imagination and birthing a fascination with those new lands and their inhabitants that continues today Columbus s epistolary announcement travelled from country to country in a late medieval media event and the rest as has been observed is history The Letter has long been the object of speculation concerning its authorship and intention British historian Cecil Jane questions whether Columbus could read and write prior to the first voyage while Demetrio Ramos argues that King Ferdinand and a minister composed the Letter and had it printed in the Spanish folio The Letter has figured in studies of Spanish Imperialism and of Discovery and Colonial period history but it also offers insights into Columbus s passions and motives as he reinvents himself and retails his vision of Peter Martyr s Novus orbis to men and women for whom Columbus was as unknown as the places he claimed to have visited The central feature of the book is its annotated variorum edition of the Spanish Letter together with an annotated English translation and word and name glossaries A list of terms from early print period and manuscript cultures supports those critical discussions In the context of her text based reading the author addresses earlier critical perspectives on the Letter explores foundational questions about its composition publication and aims and proposes a theory of authorship grounded in text linguistics discourse and culture

Phan, 2016-01-26 Without question inter religious relations are crucial in the contemporary age While most dialogue works on past and contemporary matters this volume takes on the relations among the Abrahamic religions and looks forward toward the possibility of real and lasting dialogue The book centers upon inter faith issues It identifies problems that stand in the way of fostering healthy dialogues both within particular religious traditions and between faiths The volume s contributors strive for a realization of already existing common ground between religions They engagingly explore how inter religious dialogue can be re energized for a new century Computer-assisted Reporting Bruce Garrison, 2020-07-20 Reporters in the newsroom are becoming more involved in computer assisted reporting and online news research than ever before This edition introduces readers to computer assisted reporting and to describe how leading journalists are using personal computers for news gathering in modern print broadcast and online newsrooms It provides a thorough discussion of technology and its applications to news reporting Computer Assisted Reporting focuses on the computerization of newsgathering highlighting the fact that the computer assists journalists by making writing easier and also makes gathering and organizing information more efficient As it begins the book demonstrates methods for journalists to get more from their computers such as data retrieval data analysis information storage and dissemination of that information in both processed and unprocessed forms It concludes with a refined proposal originally proposed in the first edition for five stages for development of computer literacy in the newsroom Saturday Review of Literature , 1924 **The Poetry of Raymond Carver** Sandra Lee Kleppe, 2016-02-24 Best known as one of the great short story writers of the twentieth century Raymond

Carver also published several volumes of poetry and considered himself as much a poet as a fiction writer Sandra Lee Kleppe combines comparative analysis with an in depth examination of Carver s poems making a case for the quality of Carver s poetic output and showing the central role Carver s pursuit of poetry played in his career as a writer Carver constructed his own organic literary system of autopoetics a concept connected to a paradigm shift in our understanding of the inter relatedness of biological and cultural systems This idea is seen as informing Carver s entire production and a distinguishing feature of Kleppe s book is its contextualization of Carver s poetry within the complex literary and scientific systems that influenced his development as a writer Kleppe addresses the common themes and intertextual links between Carver s poetry and short story careers situates Carver s poetry within the love poem tradition explores the connections between neurology and poetic memories and examines Carver s use of the elegy genre within the context of his terminal illness Tellingly Carver s poetry which has aroused slight interest among literary scholars is frequently taught to medical students This testimony to the interdisciplinary implications of Carver s work suggests the appropriateness of Kleppe s culminating discussion of Carver s work as a bridge between the fields of literature and medicine
