**Gaviotas** Alan Weisman, 2008-09-03 Los Llanos the rain leached eastern savannas of war ravaged Colombia are among the most brutal environments on Earth and an unlikely setting for one of the most hopeful environmental stories ever told Here in the late 1960s a young Colombian development worker named Paolo Lugari wondered if the nearly uninhabited infertile llanos could be made livable for his country's growing population He had no idea that nearly four decades later his experiment would be one of the world's most celebrated examples of sustainable living a permanent village called Gaviotas In the absence of infrastructure the first Gaviotans invented wind turbines to convert mild breezes into energy hand pumps capable of tapping deep sources of water and solar collectors efficient enough to heat and even sterilize drinking water under perennially cloudy llano skies Over time the Gaviotans experimentation has even restored an ecosystem in the shelter of two million Caribbean pines planted as a source of renewable commercial resin a primordial rain forest that once covered the llanos is unexpectedly reestablishing itself Colombian author Gabriel Garc a M rquez has called Paolo Lugari Inventor of the World Lugari himself has said that Gaviotas is not a utopia Utopia literally means no place We call Gaviotas a topia because it is real Relive their story with this special 10th anniversary edition of Gaviotas complete with a new afterword by the author describing how Gaviotas has survived and progressed over the past decade

alternative to fossil fuels Replacing motors with muscles can be considered a political act an act of self sufficiency that gains you independence The Human Powered Home is a one of a kind compendium of human powered devices gathered from a unique collection of experts Enthusiasts point to the advantages of human power Portable and available on demand Close connection to the process or product offers more control Improved health and fitness The satisfaction of being able to make do with what is available This book discusses the science and history of human power and examines the common elements of human powered devices It offers plans for making specific devices grouped by area of use and features dozens of individuals who share technical details and photos of their inventions For those who want to apply their own ingenuity or for those who have never heard of human powered machines this book is a fine reference For those who are beginning to understand the importance of a life of reduced dependency on fossil fuels this book could be a catalyst for change     *Sustainability* John C. Ayers,2017-06-26 This book presents an earth science based overview of the challenges to sustainability It provides a detailed study of climate change as well as energy food and water security across different regions The author uncovers the problems caused by current social and environmental practices and offers potential solutions Focusing on systems theory footprint analysis risk and resilience many examples are given of how to use resources sustainably especially common pool resources such as the atmosphere oceans and groundwater The book develops its ideas from an array of practical case studies centering on communal objectives and shared responsibilities     *The Carbon Farming Solution* Eric Toensmeier,2016-02-22 With carbon farming agriculture ceases to be part of the climate problem and becomes a critical part of the solution This book is the toolkit for making the soil itself a sponge for carbon It s a powerful vision Bill McKibben The Carbon Farming Solution is a book we will look back upon decades from now and wonder why something so critically relevant could have been so overlooked until that time It describes the foundation of the future of civilization Paul Hawken In this groundbreaking book Eric Toensmeier argues that agriculture specifically the subset of practices known as carbon farming can and should be a linchpin of a global climate solutions platform Carbon farming is a suite of agricultural practices and crops that sequester carbon in the soil and in above ground biomass Combined with a massive reduction in fossil fuel emissions and in concert with adaptation strategies to our changing environment carbon farming has the potential to bring us back from the brink of disaster and return our atmosphere to the magic number of 350 parts per million of carbon dioxide Toensmeier s book is the first to bring together these powerful strategies in one place Includes in depth analysis of the available research Carbon farming can take many forms The simplest practices involve modifications to annual crop production Although many of these modifications have relatively low sequestration potential they are widely applicable and easily adopted and thus have excellent potential to mitigate climate change if practiced on a global scale Likewise grazing systems such as silvopasture are easily replicable don t require significant changes to human diet and given the amount of agricultural land worldwide that is devoted to pasture can be important strategies in the carbon farming arsenal But by far

agroforestry practices and perennial crops present the best opportunities for sequestration. While many of these systems are challenging to establish and manage and would require us to change our diets to new and largely unfamiliar perennial crops, they also offer huge potential that has been almost entirely ignored by climate crusaders. Many of these carbon farming practices are already implemented globally on a scale of millions of hectares. These are not minor or marginal efforts but win-win solutions that provide food, fodder and feedstocks while fostering community self-reliance, creating jobs, protecting biodiversity and repairing degraded land, all while sequestering carbon, reducing emissions and ultimately contributing to a climate that will remain amenable to human civilization. Just as importantly, to a livable future, these crops and practices can contribute to broader social goals such as women's empowerment, food sovereignty and climate justice. The Carbon Farming Solution is at its root a toolkit and the most complete collection of climate-friendly crops and practices currently available. With this toolkit, farmers, communities and governments large and small can successfully launch carbon farming projects with the most appropriate crops and practices to their climate locale and socioeconomic needs. Toensmeier's ultimate goal is to place carbon farming firmly in the center of the climate solutions platform alongside clean solar and wind energy. With The Carbon Farming Solution, Toensmeier wants to change the discussion, impact policy decisions and steer mitigation funds to the research projects and people around the world who envision a future where agriculture becomes the protagonist in this fraught, urgent and unprecedented drama of our time. Citizens, farmers and funders will be inspired to use the tools presented in this important book to transform degraded lands around the world into productive carbon-storing landscapes.

Privileged Goods Jack P. Manno, 2019-05-30 What are the obstacles in the way of effectively solving the environmental crises of our time? What can we do to overcome them? These may be two of the most important questions heading into the 21st century. Organized human societies have the ability to completely change the world. While we have excelled at building, destroying and rebuilding, we have... *Environmental Science* Daniel D. Chiras, 2006 Completely updated, the seventh edition of *Environmental Science* enlightens students on the fundamental causes of the current environmental crisis and offers ideas on how we as a global community can create a sustainable future. **The Best Buddhist Writing 2009** Melvin McLeod, 2009 A treasury of the most notable, profound and thought-provoking Buddhism-inspired writing published in the last year, *The Best Buddhist Writing 2009* includes an interview with novelist Tom Robbins, guiding principles for a new ecospirituality from Thich Nhat Hanh, Jack Kornfield on basic human goodness, Pico Iyer's portrait of the Dalai Lama, Olivia Ames Hoblitzelle on a couple's journey through Alzheimer's disease, The Dzogchen Ponlop Rinpoche on the true enlightened nature of mind, Wendy Johnson on bringing the beginner's mind to gardening, a mindfulness practice from Pema Chodron to help us wake up to the world around us, Joan Halifax on approaching death with fearlessness and compassion, Peggy Rowe Ward and Larry Ward with stories, meditations and exercises for experiencing love in a new and deeper way, Natalie Goldberg on the art of writing personal memoir, Dzigar Kongtrül on our search for happiness, Sharon Salzberg on overcoming passion, aggression and

ignorance in our relationships Stephanie Kaza on making environmentalism a spiritual path not just a change in lifestyle Meshuga wisdom from Rabbi Rami Shapiro John Welwood on how we can use our relationships for profound spiritual growth And much more     The Untouchable Tree Peter C. Stone, 2008-10-17 The Untouchable Tree is about our connection to the magnificence the transcendence and the essential nature of trees Throughout human history they have served as shelter and as symbol And today more than ever our destiny is tied to theirs The book weaves together prose poetry and art in a unique exploration of our relationship with these plants from the billowy yet delicate black cherry to the majestic white oak Each painting subtly points to a range of historical mythological symbols reminding us of the untouchable the sacred within each of us     *The Chelsea Green Reader* Benjamin Watson, 2014 Chelsea Green the Vermont based independent publisher has always had a nose for authors and subjects that are way ahead of the cultural curve as is evident in this new anthology celebrating the company's first thirty years in publishing The more than one hundred books represented in this collection reflect the many distinct areas in which we have published from literature and memoirs to progressive politics to highly practical books on green building organic gardening and farming food and health and related subjects all of which reflect our underlying philosophy The politics and practice of sustainable living The Chelsea Green Reader offers a glimpse into our wide ranging list of books and authors and to the important ideas that they express Interesting and worth reading in their own right the individual passages when taken as a whole trace the evolution of a highly successful small publisher something that is almost an oxymoron in these days of corporate buyouts and multinational book groups From the beginning Chelsea Green's books were nationally recognized garnering positive reviews accolades and awards We've published four New York Times bestsellers and our books have set the standard for in depth how to books that remain relevant years often decades beyond their original publication date Chelsea Green was born from a single seed the beauty of craft Craft in writing and editing in a story well told or a thesis superbly expressed writes cofounder and publisher emeritus Ian Baldwin in the book's foreword Today craft continues to inform all aspects of our work design illustration production sales promotion and beyond It has even informed our business model In 2012 Chelsea Green became an employee owned company With the rise of the Internet new media platforms and a constantly shifting bookselling landscape the future of publishing is anything but predictable But if Chelsea Green's books prove anything it is that despite these challenges there remains a hunger for new and important ideas and authors and for the permanence and craftsmanship of the printed word Today our ongoing mission is stronger than ever as we launch into our next thirty years of publishing excellence     *A Genealogy of Social Violence* Clint Jones, 2016-03-03 Examining the mimetic theory of Ren Girard this book investigates the development of society as a result of an original crime a murder that shaped the way the earliest humans organized the social structures we live with today an analysis that reveals the dangerous structure of the most basic social relationships With attention to family relationships *A Genealogy of Social Violence* sheds light on the processes by which the traditional nuclear family through the mimetic behaviour of children

embeds violence into human desires and hence society as whole Challenging the thought of Girard and of Rawls in order to offer a new understanding of justice this book suggests that in order to achieve a more peaceful society what is required is not the self defeating narrative of equality developed in order to manage the violence engendered by our social institutions but a reconceptualisation of the nuclear family structure A striking critique of modern society which draws on religion mythology literature history philosophy and political theory A Genealogy of Social Violence will be of interest to social and political theorists as well as philosophers working in the area of contemporary social and European thought
