Good Tidings The Belief In Progress From Darwin To Marcuse:

Good Tidings W. Warren Wagar, 1972 The Idea of Progress in Eighteenth-century Britain David Spadafora, James Spada, 1990-01-01 The idea of progress stood at the very center of the intellectual world of eighteenth century Britain closely linked to every major facet of the British Enlightenment as well as to the economic revolutions of the period Drawing on hundreds of eighteenth century books and pamphlets David Spadafora here provides the most extensive discussion ever written of this prevailing sense of historical optimism Progress and Its Discontents Gabriel A. Almond, Garry R. Marvin, Roy Harvey Pearce, 2023-11-10 Events of the past two decades have challenged many of the fundamental beliefs institutions and values of modern western culture the culture of progress Are science and technology really progressive and beneficial Have they led to the enhancement of welfare greater happiness and moral improvement Is the continued growth of material productivity possible Desirable Are the institutions of progress viable Progress and Its Discontents assembles the views on progress of some of America's leading humanists scientists and social scientists Citing disappointed expectations of progress in spheres from science to morals and politics and the many problems created or left untouched by progress the editors conclude that the term no longer refers to an inevitable sequence of improvements but rather to an aspiration and compelling obligation Contributors Nannerl O. Keohane Georg G. Iggers Alfred G. Meyer Crawford Young Francisco J. Ayala John T. Edsall Gerald Fenberg Bernard D. Davis Gerald Holton Marc J. Roberts H. Stuart Hughes Moses Abramovitz Harvey Brooks Nathan Rosenberg Hollis B. Chenery Gianfranco Poggi Aaron Wildavsky G. Bingham Powell Jr. Samuel H. Barnes Steven Marcus Murray Krieger Robert C. Elliott Martin E. Marty Daniel Bell Frederick A. Olafson This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1982 *The Morbid Age* Richard Overy, 2009-05-07 British intellectual life between the wars stood at the heart of modernity The combination of a liberal uncensored society and a large educated audience for new ideas made Britain a laboratory for novel ways to understand the world The Morbid Age opens a window onto this creative but anxious era the golden age of the public intellectual and scientist Arnold Toynbee Aldous and Julian Huxley H. G. Wells Marie Stopes and a host of others Yet as Richard Overy argues a striking characteristic of so many of the ideas that emerged from this new age from eugenics to Freud's unconscious to modern ideas of pacifism and world government was the fear that the West was facing a possibly terminal crisis of civilization The modern era promised progress of a kind but it was overshadowed by a growing fear of decay and death an end to the civilized world and the arrival of a new Dark Age even though the country had suffered no occupation no civil war and none of the bitter ideological rivalries of inter war Europe and had an economy that survived better than most The Morbid Age explores how this strange paradox came about Ultimately Overy shows the coming of war

was almost welcomed as a way to resolve the contradictions and anxieties of this period a war in which it was believed civilization would be either saved or utterly destroyed *The Vital Science (Routledge Revivals)* Peter Morton,2014-08-01 In this title first published in 1984 Peter Morton argues that in late Victorian Britain a group of novelists and essayists quite consciously sought and found ideas in post Darwinian biology that were susceptible to imaginative transformation The period between 1860 and 1900 was a time of great confusion in biology the natural selection hypothesis was in retreat before its acute critics and no extension of evolutionary theory to human affairs was too bizarre to attract its quota of enthusiasts Writers capitalised on this prevailing uncertainty and used it to their own artistic or polemic ends A fascinating and interdisciplinary title this reissue will interest students of late Victorian literature as well as historians of biological theory between The Origin of Species and Mendel *The Twilight Years* Richard Overy,2010-11-30 From a leading British historian the story of how fear of war shaped modern England By the end of World War I Britain had become a laboratory for modernity Intellectuals politicians scientists and artists among them Arnold Toynbee Aldous Huxley and H G Wells sought a vision for a rapidly changing world Coloring their innovative ideas and concepts from eugenics to Freud s unconscious was a creeping fear that the West was staring down the end of civilization In their home country of Britain many of these fears were unfounded The country had not suffered from economic collapse occupation civil war or any of the ideological conflicts of inter war Europe Nevertheless the modern era s promise of progress was overshadowed by a looming sense of decay and death that would deeply influence creative production and public argument between the wars In *The Twilight Years* award winning historian Richard Overy examines the paradox of this period and argues that the coming of World War II was almost welcomed by Britain s leading thinkers who saw it as an extraordinary test for the survival of civilization and a way of resolving their contradictory fears and hopes about the future *The Age of Interconnection* Jonathan Sperber,2023 A monumental and accessible global history of the second half of the twentieth century from the end of World War Two to the terrorist attack on the Twin Towers offering readers the most complete portrait of the age available **Jesus and the Quest for Meaning** Thomas H. West, A new approach to introducing theology As God s self communication to humans Jesus is the key to the human search for meaning argues Thomas West He therefore introduces the practice of theology through Christology From the question of personal meaning and self constitution and their relationship to transcendent meaning and value he proceeds to discuss the figure and import of Jesus and then the ethical imperative engendered through encounter with him Fresh and clear West s book is an invitation to grapple with one s religious commitments especially in light of recent insights in biblical studies and Continental feminist and liberation theologies This new text will prove an engaging and effective introduction to theological thinking for both undergraduates and Christian adults **Thinking Confederates** Dan R. Frost,2000 Dan Frost shows how inspired by the idea of progress these men set about transforming Southern higher education Recognizing the north s superiority in industry and technology they turned their own schools from a classical

orientation to a new emphasis on science and engineering These educators came to define the Southern idea of progress and passed it on to their students thus helping to create and perpetuate an expectation for the arrival of the New South

BOOK JACKET *Hope in a Democratic Age* Alan Mittleman, 2009-07-02 How and why should hope play a key role in a twenty first century democratic politics Alan Mittleman offers a philosophical exploration of the theme contending that a modern construction of hope as an emotion is deficient He revives the medieval understanding of hope as a virtue reconstructing this in a contemporary philosophical idiom In this framework hope is less a spontaneous reaction than it is a choice against despair a decision to live with confidence and expectation based on a rational assessment of possibility and a faith in the underlying goodness of life In cultures shaped by biblical teaching hope is thought praiseworthy Mittleman explores the religious origins of the concept of hope in the Hebrew Scriptures New Testament rabbinic literature and Augustine He traces the roots of both the praise of hope in Jewish and Christian thought and the criticism of hope in Greco Roman thought and in the tradition of philosophical pessimism Arguing on behalf of a straightened sober form of hope he relates hope as a virtue to the tasks of democratic citizenship Without diminishing the wisdom found in tragedy a strong argument emerges in favour of hope as a way of taking responsibility for the world Drawing on insights from scriptural and classical texts philosophers and theologians ancient and modern Mittleman builds a compelling case for placing hope at the centre of democratic political systems

Mystic Chords of Memory Michael Kammen, 2011-08-17 *Mystic Chords of Memory* Illustrated with hundreds of well chosen anecdotes and minute observations Kammen is a demon researcher who seems to have mined his nuggets from the entire corpus of American cultural history insightful and sardonic Washington Post Book World In this ground breaking panoramic work of American cultural history the Pulitzer Prize winning author of *A Machine That Would Go of Itself* examines a central paradox of our national identity How did the land of the future acquire a past And to what extent has our collective memory of that past as embodied in our traditions have been distorted or even manufactured Ranging from John Adams to Ronald Reagan from the origins of Independence Day celebrations to the controversies surrounding the Vietnam War Memorial from the Daughters of the American Revolution to immigrant associations and filled with incisive analyses of such phenomena as Americana and its collectors historic villages and Disneyland *Mystic Chords of Memory* is a brilliant immensely readable and enormously important book Fascinating a subtle and teeming narrative masterly Time This is a big ambitious book and Kammen pulls it off admirably He brings a prodigious mind and much scholarly rigor to his task an important book and a revealing look at how Americans look at themselves Milwaukee Journal

The Anticipation Novelists of 1950s French Science Fiction Bradford Lyau, 2014-01-10 Following World War II the Fleuve Noir publishing house published popular American genre fiction in translation for a French audience Their imprint Anticipation specialized in science fiction but mostly eschewed translations from English preferring instead French work thus making the imprint an important outlet for native French postwar ideas and aesthetics This critical text examines in ideological terms eleven writers

who published under the Anticipation imprint revealing the way these writers criticized midcentury notions of progress while adapting and reworking American genre formats *The Emergence of Latin American Science Fiction* Rachel Haywood Ferreira, 2011-07-01 A fantastic voyage through the early science fiction of Latin America Early science fiction has often been associated almost exclusively with Northern industrialized nations In this groundbreaking exploration of the science fiction written in Latin America prior to 1920 Rachel Haywood Ferreira argues that science fiction has always been a global genre She traces how and why the genre quickly reached Latin America and analyzes how writers in Argentina Brazil and Mexico adapted science fiction to reflect their own realities Among the texts discussed are one of the first defenses of Darwinism in Latin America a tale of a time traveling history book and a Latin American Frankenstein Latin American science fiction writers have long been active participants in the sf literary tradition expanding the limits of the genre and deepening our perception of the role of science and technology in the Latin American imagination The book includes a chronological bibliography of science fiction published from 1775 to 1920 in all Latin American countries *Worlds of Irving Howe* John Rodden, 2015-12-03 The Worlds of Irving Howe The Critical Legacy is a wide ranging anthology of criticism devoted to the literary cultural and political work of the writer Irving Howe The book offers a broad cross section of critical and biographical writings about Howe Collected here are assessments of Howe s work written by some of the most prominent intellectuals of the twentieth century among them Lionel Trilling Alfred Kazin C Vann Woodward Robert Coles Daniel Bell Malcolm Cowley and Arthur Schlesinger The critical estimates of Howe s major books collected here and framed by a major biographical introduction by John Rodden constitute a sharply focused lens through which readers can re evaluate the legacy of one of American s leading intellectuals and thereby understand the main issues of twentieth century Anglo American cultural history Contributors Lionel Trilling Alfred Kazin C Vann Woodward Newton Arvin Charles Angoff Edward Dahlberg Isaac Rosenfeld Richard Chase H D Lasswell Dennis Wrong Michael Harrington Christopher Lasch Robert Coles Daniel Bell Malcolm Cowley Arthur Schlesinger Theodore Solotaroff Clive James Norman Podhoretz Irving Kristol and William Phillips among others *The Christian Tradition* Jaroslav Pelikan, 1991-10-04 Explores the iconography dogma and liturgy of Greek Slavic and Syriac forms of Christianity *The War on Terrorism and the Terror of God* Lee Griffith, 2004 Uniquely relevant in a world shaken by recent acts of terror this title calls people of faith to the way of peace the Christian response to evil and violence *Metaphors for Environmental Sustainability* Brendon Larson, 2011-06-07 Scientists turn to metaphors to formulate and explain scientific concepts but an ill considered metaphor can lead to social misunderstandings and counterproductive policies Brendon Larson observes in this stimulating book He explores how metaphors can entangle scientific facts with social values and warns that particularly in the environmental realm incautious metaphors can reinforce prevailing values that are inconsistent with desirable sustainability outcomes *Metaphors for Environmental Sustainability* draws on four case studies two from nineteenth century evolutionary science and two from contemporary biodiversity science

to reveal how metaphors may shape the possibility of sustainability Arguing that scientists must assume greater responsibility for their metaphors and that the rest of us must become more critically aware of them the author urges more critical reflection on the social dimensions and implications of metaphors while offering practical suggestions for choosing among alternative scientific metaphors *Biology and Ideology from Descartes to Dawkins* Denis R. Alexander, Ronald L. Numbers, 2010-05-15 Over the course of human history the sciences and biology in particular have often been manipulated to cause immense human suffering For example biology has been used to justify eugenic programs forced sterilization human experimentation and death camps all in an attempt to support notions of racial superiority By investigating the past the contributors to *Biology and Ideology from Descartes to Dawkins* hope to better prepare us to discern ideological abuse of science when it occurs in the future Denis R Alexander and Ronald L Numbers bring together fourteen experts to examine the varied ways science has been used and abused for nonscientific purposes from the fifteenth century to the present day Featuring an essay on eugenics from Edward J Larson and an examination of the progress of evolution by Michael J Ruse *Biology and Ideology* examines uses both benign and sinister ultimately reminding us that ideological extrapolation continues today An accessible survey this collection will enlighten historians of science their students practicing scientists and anyone interested in the relationship between science and culture *Uncertain Victory* James T. Kloppenberg, 1988-03-24 Between 1870 and 1920 two generations of European and American intellectuals created a transatlantic community of philosophical and political discourse *Uncertain Victory* the first comparative study of ideas and politics in France Germany the U S and Great Britain during these fifty years demonstrates how a number of thinkers from different traditions converged to create the theoretical foundations for new programs of social democracy and progressivism Kloppenberg studies a wide range of pivotal theorists and activists including philosophers such as William James Wilhelm Dilthey and T H Green democratic socialists such as Jean Jaur s Walter Rauschenbusch Eduard Bernstein and Beatrice and Sidney Webb and social theorists such as John Dewey and Max Weber as he establishes the connection between the philosophers challenges to the traditions of empiricism and idealism and the activists opposition to the traditions of laissez faire liberalism and revolutionary socialism By demonstrating a link between a philosophy of self conscious uncertainty and a politics of continuing democratic experimentation and by highlighting previously unrecognized similarities among a number of prominent 19th and 20th century thinkers *Uncertain Victory* is sure to spur a reassessment of the relationship between ideas and politics on both sides of the Atlantic **The Metaphysics of Evolution** David L. Hull, 1989-01-01 This critical collection of essays represents the best of the best when it comes to philosophy of biology Many chapters treat evolution as a biological phenomenon but the author is more generally concerned with science itself Present day science particularly current views on systematics and biological evolution are investigated The aspects of these sciences that are relevant to the general analysis of selection processes are presented and they also serve to exemplify the general characteristics exhibited by science since its inception
