Good Web Site Guide 2005:

History in Practice 2nd edition Ludmilla Jordanova, 2016-07-28 History in Practice explores the discipline's breadth, its complexities and the tasks it takes on. This study by one of the liveliest and most acute practitioners in the field demystifies what historians do. It looks at history as an academic discipline but also engages with the use of historical ideas in the wider world. Historical work has public consequences and draws considerable energy from contemporary preoccupations. For this new edition of her respected and widely used book Ludmilla Jordanova has revised the text and added a new chapter that takes into account recent world events. She discusses the role of the internet, globalisation, world history and the current enthusiasm for military history. This book is essential reading for all students needing an understanding of history as a discipline.

The Push Guide to Choosing a University Jonathan Rich, 2004 This compact guide sets out to advise young people on what to consider before making decisions about attending university. It encourages them to question if university is for them and if so what they should think about before choosing a university.

Administering the School Library Media Center Betty J. Morris, 2010-08-16 This is the most comprehensive textbook on school library administration available now, updated to include the latest standards and address new technologies. This reference text provides a complete instructional overview of the workings of the library media center from the basics of administration, budgeting, facilities management, organization, selection of materials and staffing to explanations on how to promote information literacy and the value of digital tools like blogs, wikis and podcasting. Since the publication of the fourth edition of Administering the School Library Media Center in 2004, many changes have altered the landscape of school library administration: the implementation of NCLB legislation and the revision of AASL standards, just to mention two. The book is divided into 14 chapters, each devoted to a major topic in school library media management. This latest edition gives media specialists a roadmap for designing a school library that is functional and intellectually stimulating, while leading sources provide guidance for further research. **2007**
