Writers of the Black Chicago Renaissance Steven C. Tracy,2011-11-01 Writers of the Black Chicago Renaissance comprehensively explores the contours and content of the Black Chicago Renaissance a creative movement that emerged from the crucible of rigid segregation in Chicago s Black Belt from the 1930s through the 1960s Heavily influenced by the Harlem Renaissance and the Chicago Renaissance of white writers its participants were invested in political activism and social change as much as literature art and aesthetics The revolutionary writing of this era produced some of the first great accolades for African American literature and set up much of the important writing that came to fruition in the Black Arts Movement The volume covers a vast collection of subjects including many important writers such as Richard Wright Gwendolyn Brooks and Lorraine Hansberry as well as cultural products such as black newspapers music and theater The book includes individual entries by experts on each subject a discography and filmography that highlight important writers musicians films and cultural presentations and an introduction that relates the Harlem Renaissance the White Chicago Renaissance the Black Chicago Renaissance and the Black Arts Movement Contributors are Robert Butler Robert H Cataliotti Maryemma Graham James C Hall James L Hill Michael Hill Lorraine King Lawrence Jackson Angelene Jamison Hall Keith Leonard Lisbeth Lipari Bill V Mullen Patrick Naick William R Nash Charlene Regester Kimberly Ruffin Elizabeth Schultz Joyce Hope Scott James Smethurst Kimberly M Stanley Kathryn Waddell Takara Steven C Tracy Zoe Trodd Alan Wald Jamal Eric Watson Donyel Hobbs Williams Stephen Caldwell Wright and Richard Yarborough **The Lever of Riches** Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences

between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
