Gothic Art Michael Camille,1996 When we look at the soaring spaces of Chartres cathedral or the shimmering pages of a gilded and painted manuscript we are witnesses to a new kind of vision In this radical reappraisal of Gothic art in Europe the word Gothic describes not only an art style but a changing concept of space time and society a new kind of perception both visual and spiritual in which light is of central importance Camille shows us how the art of the thirteenth and fourteenth centuries was seen in its own time and explores the way vision itself was understood In this age of glorious painting magnificent intricate architecture and sculpture and jewellike manuscript illumination art was an expression of religious

passion and earthly power of public and private wealth of science and learning The new vision led to an explosion of brilliant images but had its grim side rarely noticed by art history the distorted representation of others like Jews heretics and lepers a new vision not only of the marvelous but also of the grotesque How to Recognize Gothic Art Maria Cristina

Twelfth and Thirteenth Centuries Jean Bony, 1983 Gothic architecture is the most visible and striking product of medieval European civilization Jean Bony whose reputation as a medievalist is worldwide presents its development as an adventure of the imagination allied with radical technical advances the result of a continuing quest for new ways of handling space and light as well as experimenting with the mechanics of stone construction He shows how the new architecture came unexpectedly to be invented in the Paris region around 1140 and follows its history in the great cathedrals of northern France and dozens of other key buildings to the end of the thirteenth century when profound changes occurred in the whole fabric of medieval civilization Rich illustrations including comprehensive maps enhance the text and themselves constitute an exceptionally valuable documentation Despite its evident scholarly intention this book is not meant for specialists alone but is conceived as a progressive infiltration into the complexities of history at work revealing its unpredictable vitality to the uninitiated curious mind **A Companion to Medieval Art** Conrad Rudolph, 2019-01-31 A fully updated and

Reeve, 2020-07-15 Gothic Architecture and Sexuality in the Circle of Horace Walpole shows that the Gothic style in architecture and the decorative arts and the tradition of medievalist research associated with Horace Walpole 1717-1797 and his circle cannot be understood independently of their own homoerotic culture Centered around Walpole's Gothic villa at Strawberry Hill in Twickenham Walpole and his Strawberry Committee of male friends designers and dilettantes invigorated an extraordinary new mode of Gothic design and disseminated it in their own commissions at Old Windsor and Donnington Grove in Berkshire Lee Priory in Kent the Vyne in Hampshire and other sites Matthew M. Reeve argues that the new third sex of homoerotically inclined men and the new modern styles that they promoted including the Gothic style and chinoiserie were interrelated movements that shaped English modernity The Gothic style offered the possibility of an alternate aesthetic and gendered order a queer reversal of the dominant Palladian style of the period Many of the houses built by Walpole and his circle were understood by commentators to be manifestations of a new queer aesthetic and in describing them they offered the earliest critiques of what would be called a queer architecture Exposing the role of sexual coterie in the shaping of eighteenth century English architecture this book offers a profound and eloquent revision to our understanding of the origins of the Gothic Revival and to medievalism itself It will be welcomed by architectural historians as well as scholars of medievalism and specialists in queer studies
