Environmental Finance for the Developing World Michael Curley,2020-04-08 Financing the Global Environment examines the financial techniques and strategies necessary to obtain funding to undertake infrastructure and environmental projects Despite conventional notions that monies are typically not readily available for large scale environmental projects the book explains how this is usually not the case and will provide the necessary steps tools and organizational methods necessary for successful project finance in any region It demonstrates how the largest possible projects could be undertaken at the lowest possible cost and how a utility's excess operating income could be used to improve the system Features Presents methods for the sourcing of funds and for maximizing income Defines what types of income can be used for making debt service payments and how it can be estimated Explains the basic concepts of loans and debt as well as the present value theory of money This book serves as a useful guide for practicing professionals industry executives and government officials who work with water and wastewater utilities and infrastructure and are involved with financial project preparation

Project Financing and the International Financial Markets Esteban C. Buljevich,Yoon S. Park,2007-08-27 Since the 1970s the practice of financing major private and public sector capital intensive projects has shifted to an ever greater reliance on private funding sources as opposed to direct financing through the issuance of corporate or government bonds In the 1990s these financing practices have undergone further changes with the increasing globalization of capital markets the growth of derivative instruments and the rapid increase in information technology that enhances cash management practices Today's project financing market is increasingly using sophisticated capital market bank and agency financing mechanisms as well as using derivative instruments for asset and liability management Thus financial market innovations are bringing the once separate fields of project financing and international finance more closely together This is the first book to treat both topics as an interrelated whole for contemporary project

financing cannot be fully understood without a good working knowledge of the international financial markets that have developed the various financing techniques and funding sources being used The book provides an in depth description of cross border project financing as a technique for financing capital intensive projects as well as an overview of certain financing and derivative instruments currently available in the global financial markets The first part of the book provides an overview of certain funding and derivative instruments currently used in the international financial markets including a general overview of financial innovations that have occurred in recent decades Topics covered include an introduction to the syndicated Euro credit market an overview of various marketable debt securities actively used in the international financial markets an introduction to depositary receipt as an innovative way of raising cross border equity capital an elaboration of the derivative instruments most commonly used in the project financing arena including interest rate currency and commodity swaps and finally an overview of banks off balance sheet activities as a critical driving force for the participation of banks in the international financial and derivative markets The second part of the book provides an in depth analysis of project financing that concentrates on the financier s perspective Topics covered include a general overview of the project financing industry a step by step description of a typical cross border project finance transaction a description of the main characteristics and advantages of project financing as opposed to more traditional corporate lending practices an overview of appraisal techniques for assessing project financing a comprehensive analysis of the different risk management techniques used in project financing for reducing distributing and hedging risks and a brief overview of certain limited resource financing schemes The book includes a special focus on the various stages of the risk management process for project financing elaborating on the different stages of risk identification risk assessment risk reduction risk distribution and hedging and insurance The authors also provide a comprehensive glossary of terms relating to international finance and project financing This book will fulfill the need for an essential text on project financing as well as a professional reference guide
