Dynamic Process

Methodology in the Social and Developmental Sciences Jaan Valsiner, Peter C. M. Molenaar, Maria C.D.P. Lyra, Nandita Chaudhary, 2009-07-09 All psychological processes like biological and social ones are dynamic Phenomena of nature society and the human psyche are context bound constantly changing and variable This feature of reality is often not recognized in the social sciences where we operate with averaged data and with homogeneous stereotypes and consider our consistency to be the cornerstone of rational being Yet we are all inconsistent in our actions within a day or from one day to the next and much of such inconsistency is of positive value for our survival and development Our inconsistent behaviors and thoughts may appear chaotic yet there is generality within this highly variable dynamic The task of scientific methodologies qualitative and quantitative is to find out what that generality is It is the aim of this handbook to bring into one framework various directions of construction of methodology of the dynamic processes that exist in the social sciences at the beginning of the 21st century This handbook is set up to bring together pertinent methodological scholarship from all over the world and equally from the quantitative and qualitative orientations to methodology In addition to consolidating the pertinent knowledge base for the purposes of its further growth this book serves the major educational role of bringing practitioners students researchers and professionals interested in applications the state of the art know how about how to think about extracting evidence from single cases and about the formal mathematical statistical tools to use for these purposes

Ryan J. Persram,Bianca Panarello,Melisa Castellanos,Lisa Astrologo,William M. Bukowski,2021-10-14 Measurement burst designs in which assessments of a set of constructs are made at two or more times in quick succession e g within days can be used as a novel method to improve the stability of basic measures typically used in longitudinal peer research In this Element we hypothesized that the stabilities for adolescent reported peer acceptance anxiety and self concept would be stronger when using the measurement burst approach versus the single time observation Participants included youth between 10 and 13 years old who completed a sociometric assessments of acceptance and measures of b social and test anxiety and c self concept across three times with two assessments made at each burst Findings broadly showed that the stabilities were significantly stronger with the measurement burst when compared to the single time assessment supporting our main hypothesis We discuss the utility of the measurement burst in a broader context and considerations for researchers

Handbook of Child Psychology and Developmental Science, Cognitive Processes ,2015-03-31 The essential reference for human development theory updated and reconceptualized The Handbook of Child Psychology and Developmental Science a four volume reference is the field defining work to which all others are compared First published in 1946 and now in its Seventh Edition the Handbook has long been considered the definitive guide to the field of developmental science Volume 2 Cognitive Processes describes cognitive development as a relational phenomenon that can be studied only as part of a larger whole of the person and context relational system that sustains it In this volume specific domains of cognitive development are contextualized with respect to biological processes and sociocultural contexts Furthermore key themes and issues e g the importance of symbolic systems and social understanding are threaded across multiple chapters although every each chapter is focused on a different domain within cognitive development Thus both within and across chapters the complexity and interconnectivity of cognitive development are well illuminated Learn about the inextricable intertwining of perceptual development motor development emotional development and brain development
