Computer Science Handbook

Allen B. Tucker,2004-06-28 When you think about how far and fast computer science has progressed in recent years it s not hard to conclude that a seven year old handbook may fall a little short of the kind of reference today s computer scientists software engineers and IT professionals need With a broadened scope more emphasis on applied computing and more than 70 chap

Display Systems Lindsay MacDonald,Anthony C. Lowe,1997-07-07 A current overview of Display Systems

written by recognised experts in the field This book gives practical guidance on the latest technological developments and new application areas of displays which will enable the reader to gain an understanding of the current state of the art as well as the major trends that will shape future applications of displays and display systems Display Systems offers an insight into display technology with a view to defining its best potential by focusing on performance assessment and optimum utilisation It brings together complimentary disciplines of design hardware and usage covering a wide range of developments and is written by leading international experts The book is divided into three sections 1 requirements for display systems covering topics such as applications and evaluation 2 display technology covering developments in flat panel displays as well as CRT s and 3 display characterisation including measurement techniques and colour specification Also covered are ergonomic

requirements for display systems and their mutual dependence on standards The book will be welcomed by scientists technologists and engineers active in the field and also by the developers of a wide range of systems and applications for displays Its technical content is suitable for final year undergraduate or postgraduate study The Society for Information Display SID is an international society which has the aim of encouraging the development of all aspects of the field of information display Indeed it is the only international society dedicated solely to this field which is broad and inter disciplinary not only in the scientific sense but through development and manufacturing to marketing Wiley SID Series in Display Technology This volume is the first in the series which aims to present a comprehensive technical discussion of the many disciplines which must be combined in the development of display systems

Perspectives of Information Systems

Vesa Savolainen,2012-12-06 Information system science defined broadly is highly interdisciplinary because it can be seen as the effective analysis design delivery use and impact of information technology in organizations and society Many basic as well as advanced books on information systems and their development apply approaches and theories from such disciplines as technology management science economics mathematics psychology sociology and philosophy Such new branches of information system science as mobile information systems multimedia information systems telematic commerce and cooperative work support systems have incorporated theories from such disciplines as organization science education sciences communication science and musicology Objectives and Uses of This Book This book focuses on various issues in information systems and their development as well as on the advanced utilization of new information technology The fields and issues that are analyzed in this book have not been discussed in the same context in the current scientific literature although they are becoming more important in information systems development This book includes both theoretical foundations and practical approaches for each topic and therefore it is of relevance both to scientists of information systems and to practitioners in information systems development introduction and use Large companies and software houses will also find this book useful in its discussion of methods for evaluating information technologies systems methodologies and tools Our colleagues have expressed a need for this kind of book We offer new perspectives on key topics in information systems research
