Bergquist, Kenneth Pawlak, 2007-10-19 In *The Four Cultures of the Academy* William H Bergquist identified four different yet interrelated cultures found in North American higher education collegial managerial developmental and advocacy In this new and expanded edition of that classic work Bergquist and coauthor Kenneth Pawlak propose that there are additional external influences in our global culture that are pressing upon the academic institution forcing it to alter the way it goes about its business Two new cultures are now emerging in the academic institution as a result of these global external forces the virtual culture prompted by the technological and social forces that have emerged over the past twenty years and the tangible culture which values its roots community and physical location and has only recently been evident as a separate culture partly in response to emergence of the virtual culture These two cultures interact with the previous four creating new dynamics [Encyclopedia of Educational Leadership and Administration](#) Fenwick W. Shaping the College Curriculum Lisa R. Lattuca,Joan S. Stark,2009-08-17 Shaping the College Curriculum focuses on curriculum development as an important decision making process in colleges and universities The authors define curriculum as an academic plan developed in a historical social and political context They identify eight curricular elements that are addressed intentionally or unintentionally in developing all college courses and programs By exploring the interaction of these elements in context they use the academic plan model to clarify the processes of course and program planning enabling instructors and administrators to ask crucial questions about improving teaching and optimizing student learning This revised edition continues to stress research based educational practices The new edition consolidates and focuses discussion of institutional and sociocultural factors that influence curricular decisions All chapters have been updated with recent research findings relevant to curriculum leadership accreditation assessment and the influence of academic fields while two new chapters focus directly on learning research and its implications for instructional practice A new chapter drawn from research on organizational change provides practical guidance to assist faculty members and administrators who are engaged in extensive program improvements Streamlined yet still comprehensive and detailed this revised volume will continue to serve as an invaluable resource for individuals and groups whose work includes planning designing delivering

evaluating and studying curricula in higher education This is an extraordinary book that offers not a particular curriculum or structure but a comprehensive approach for thinking about the curriculum ensuring that important considerations are not overlooked in its revision or development and increasing the likelihood that students will learn and develop in ways institutions hope they will The book brings coherence and intention to what is typically an unstructured haphazard and only partially rational process guided more by beliefs than by empirically grounded substantive information Lattuca and Stark present their material in ways that are accessible and applicable across planning levels course program department and institution local settings and academic disciplines It s an admirable and informative marriage of scholarship and practice and an insightful guide to both Anyone who cares seriously about how we can make our colleges and universities more educationally effective should read this book Patrick T Terenzini distinguished professor and senior scientist Center for the Study of Higher Education The Pennsylvania State University     *Introducing Interdisciplinary Modules in Higher Education* Simon Pratt-Adams,Mark Warnes,Elaine Brown,2025-03-31 This interdisciplinary book uses key examples and specific case studies from the Trailblazers of Anglia Ruskin University UK to address the successes and challenges experienced during the creation development and running of breadth modules It s been carefully written to support anyone looking to implement this innovative method into their own university setting With content informed by the United Nations Sustainable Development Goals and using active learning pedagogies interdisciplinary student teams work together to develop sustainable solutions allowing for the growth of skills vital for enhancing student employability The chapters are grounded in theory making the discussions transferable to a wide readership interested in interdisciplinary approaches at the higher education level The theoretical underpinnings of the discussions in each chapter will open up questions relating to contemporary issues such as diversity and representation poverty and sustainability artificial intelligence and social justice This is a must read text for anyone seeking to implement similar breadth modules at their institutions or considering how to develop strategies that address whole institution questions such as sustainability and employability     **Liberal Arts Education in a Changing Society** You Guo Jiang,2014-12-16 In *Liberal Arts Education in a Changing Society* A New Perspective on Chinese Higher Education You Guo Jiang S J provides a unique focus on the re emergence of liberal arts education in China This is the first book that explores in depth the development of liberal arts education in China Through the extensive use of first hand materials relating to the liberal arts and current viewpoints of Chinese scholars and higher education leaders Jiang concludes that China must implement a good liberal arts education program to form responsible global citizens     *A Sense of Belonging* Hilton Scott,2022-03-08 This book takes an interdisciplinary approach to a societal challenge that both affects and is affected by the church in multi racial multi cultural and otherwise pluralistic communities In certain contexts around the world there are pertinent examples of the struggles that come with learning to live together in the midst of diversity and plurality such as the post apartheid Republic of South Africa However these more often than not racial and cultural struggles

could be eased by developing worship services that are more relevant and inclusive This in turn should instill a sense of belief and a way of inclusive thinking culminating in more inclusive living The approach developed in this book stems from the aphorism *lex orandi lex credendi lex con vivendi* or as we pray so we believe so we live together      **Blended Learning**
