A Handbook of Traditional Chinese Gynecology Bob Flaws, 1987 This book was the first English language translation of a complete Chinese clinical manual on TCM gynecology and obstetrics It was the textbook for the OB GYN class at the Zhejiang College of Chinese Medicine in Hangzhou PRChina It covers the disease causes and mechanisms and the pattern discrimination treatment for 35 commonly encountered complaints The book is divided into five sections 1 menstrual diseases 2 abnormal vaginal discharge diseases 3 gestational birthing diseases 4 postpartum diseases and 5 miscellaneous diseases Because Chinese gynecology in China means treatment via the internal administration of Chinese herbs all the treatments in this book are herbal ones If one wants to buy a single book covering all of Chinese gynecology in an introductory survey fashion this is the book to buy

Clinical Handbook Of Chinese Medicine Bob Xu, Chun-su Yuan, 2013-10-31 This is a concise handbook providing a quick clinical reference on Chinese medicinal treatments for many diseases based on Traditional Chinese Medicine theory and practice Organized by different clinical conditions and diseases it provides clinicians and healthcare professionals with definitions and recommended treatment methods especially herbal medicine formulae In addition to being a comprehensive quick reference source this handbook also conveys a generalized understanding of Traditional Chinese Medicine

The Use of Traditional Chinese Medicine for Treating Female Infertility Kathleen Albertson, 2007-01-01 Infertility affects more than 3 million married couples in the United States This study explored the use of Traditional Chinese Medicine TCM for treating female infertility Surveys queried allopathic practitioners and TCM practitioners regarding their perceived knowledge and use of TCM The vast majority of allopathic practitioners referred patients to acupuncturists and believed that acupuncture helped patients The majority of respondents identified a trend for treating female infertility with TCM and Western medical procedures The majority of respondents supported the concurrent use of allopathic protocols and TCM but did not support the concurrent use of TCM and Chinese Herbal Medicine CHM More than 62% of respondents expressed familiarity with clinical studies that used TCM for treating stress depression and irregular menstrual cycles Positive results from evidence based studies would likely encourage allopathic practitioners to use TCM and adopt a more holistic collaborative approach for treating female infertility
