## **Handbook Of Psychooncology Psychological Care Of The Patient With Cancer:**

**Handbook of Psychooncology** Jimmie C. Holland, Julia Howe Rowland, 1989      Handbook of Psychooncology Jimmie C. Holland, Julia H. Rowland, 1990 Written for oncologists nurses and mental health professionals this comprehensive volume is the first to cover the full range of psychological social and psychiatric problems facing cancer patients their families and health care staff The Handbook provides detailed guidance on the psychological care of cancer patients at all stages of the disease It offers lucid accounts of such clinical issues as how patients cope with cancer the psychological problems associated with surgery radiation chemotherapy and immunotherapy the psychosocial problems associate with specific tumors normal adaptation patterns common psychiatric complications and their treatment the management of pain nausea and vomiting and sexual problems In addition to reviewing the key studies in these areas it gives full coverage complete with how to guidance of the unique problems of childhood cancer and cancer in the elderly AIDS how oncology staff cope with the stresses of care and common difficulties arising from legal and ethical considerations The final section outlines research issues in assessing quality of life and psychosocial function and offers an evaluation of their relative value The product of a decade of clinical experience and research at the Psychiatry Service of Memorial Sloan Kettering Cancer Center this is a carefully integrated well balanced work that includes many tables which will be particularly useful in teaching and lecturing

**Handbook of Clinical Psychology in Medical Settings** Ronald H. Rozensky, Jerry J. Sweet, Steven M. Tavian, 2013-06-29 For two decades I have been responding to questions about the nature of health psychology and how it differs from medical psychology behavioral medicine and clinical psychology From the beginning I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology I have repeatedly used an analogy to Newell and Simon's General Problem Solver program of the late 1950s and early 1960s which had two major functional parts in addition to the executive component One was the problem solving core the procedural competence the other was the representation of the problem environment In the analogy the concepts knowledge and techniques of psychology constitute the core competence the health system in all its complexity is the problem environment A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system Quite apparently there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system I hesitate to refer to them as areas of specialization as the man who gave health psychology its formal definition Joseph Matarazzo has said that there are no specialties in psychology cited in the editors preface to this book

**Handbook of Psychiatry in Palliative Medicine** Harvey Max Chochinov, William Breitbart, 2009 Eight years has passed since the first edition of The Handbook of Psychiatry in Palliative Medicine was published In that time psychiatric or psychosocial palliative care has evolved the net effect on palliative medicine has been transformative Palliation that neglects

psychosocial dimensions of patient and family experience de facto fails to meet contemporary standards of comprehensive palliative care While a focus on somatic issues has sometimes overshadowed attention to psychological existential and spiritual end of life challenges the past decade has seen an all encompassing multi disciplinary approach to care for the dying beginning to take hold The first comprehensive textbook of psychiatric palliative care this new edition has been fully updated reorganized and expanded to include eleven new chapters Written by 67 internationally known psychiatry and palliative care experts the book is truly an essential reference for all providers of palliative care including psychiatrists psychologists mental health counselors oncologists hospice workers and social workers Each chapter has been updated to address new therapeutic modalities and approaches as well as new research trends and opportunities for each topic     Psycho-Oncology Jimmie C. Holland,2010-03-22 Psycho Oncology was the first comprehensive text in the field of psychosocial oncology and remains the gold standard today Written by 67 internationally known psychiatry and palliative care experts the resource is truly an essential reference for all providers of palliative care Joining Oxford Medicine Online this resource offers the best quality content in an easy to access format Online only benefits include downloading images and figures to PowerPoint and downloading chapters to PDF     **Cancer and the Family Life Cycle** Theresa A. Veatch,Donald R. Nicholas,Marci A. Barton,2013-05-13 This book uses current psychosocial literature in combination with empirical research and clinical accounts of family adaptation to help professionals and families cope with the impact of cancer It is broad in scope and includes families in any life cycle i e single adults children adolescents and later life This book with its solid theoretical foundation will be especially beneficial to any professional who is helping a family to adapt to cancer     **Psycho-Oncology** William Breitbart,Phyllis Butow,Paul Jacobsen,Wendy Lam,Mark Lazenby,Matthew Loscalzo,2021-01-22 The fourth edition of Psycho Oncology is a current comprehensive reference for psychiatrists psychologists oncologists hospice workers and social workers seeking to understand and manage the psychological issues involved in the care of persons with cancer and the psychological social and behavioral factors that contribute to cancer risk and survival     **Psycho-Oncology for the Clinician** Shulamith Kreitler,2019-03-18 This volume strives to give oncologists and other medical practitioners a thorough picture of the oncology patient It s designed to show that psychological needs of the patient are an important aspect that should be considered for optimizing the effects of cancer treatment no less than genetic immunological physiological and other medical features that are often considered as necessary components of personalized medicine Using evidence based information the book describes the different ways cancer touches upon a person s life including emotional physical and social changes important decisions and support structure It also details the phases every cancer patient encounters along the way from getting tested and waiting for the diagnosis to treatments survival and confronting one s mortality Psycho oncology for the Clinician will serve to contribute to the further scientific development of psycho oncology expandits use as a treatment modality strengthen its status as an essential component of cancer care and promote the acceptance of psycho oncology as

the new evidence based constituent of personalized medicine in oncology      Psycho-Oncology Thomas N. Wise, Massimo Biondi, Anna Costantini, 2013-04-15 Psycho oncology integrates research and clinical wisdom across multiple disciplines including oncology psychiatry psychology surgery radiotherapy and palliative care among others in the service of educating oncologists physicians psychiatrists and other mental health care providers and hospital chaplains about the psychological and psychosocial challenges faced by patients with neoplastic disorders As cancer treatment has improved the number of patients deemed cancer survivors has grown along with their more complex long term mental health issues This book assists care providers in meeting the challenge presented by this population Written by international experts in psycho oncology the volume offers a compact overview of the clinical elements in this field with a primary focus on the biopsychosocial aspects of individuals with cancer as well as their families and important people in their lives Its bench to bedside approach ensures that the techniques presented are evidence based practical and effective The following are among the book s many helpful features The chapters are designed to stand alone to be shared or consulted as needed but they also develop a coherent and sequential discussion about management of the patient with cancer as well as concerns involving the patient s family Thus the book as a whole serves as a comprehensive textbook in the field The book s structure is based on psychosocial staging much as the disease itself is staged and progresses from discovery to initial diagnosis treatment intervention remission and so forth Each phase has its own challenges for patient family and care provider and supportive strategies are offered Because identifying those patients in need of support and treatment intervention is critical the authors provide screening techniques as well as an entire chapter devoted to quality of life assessment to help clinicians recognize struggling patients and alleviate their distress A final chapter addresses developing trends in psycho oncology and suggests that international standards of care for the cancer patient must include competent and compassionate psychosocial assessment and treatment Concise and clinically focused yet addressing the broad issues as well Psycho oncology offers cutting edge information and invaluable assistance to physicians and mental health professionals responsible for managing patients and the families of patients with neoplastic disorders      Current Bibliographies in Medicine ,1988      *Women's Cancers* Alison Keen, Elaine Lennan, 2011-02-11 Patients with breast and gynaecological cancers have to contend with a large number of difficult and challenging issues To help them to do this it is vital that their health carers are fully informed in all aspects of women s cancers This book provides a comprehensive and meaningful picture of this oncological area including epidemiology histopathology staging genetic predisposition sexual function fertility treatment and management survivorship and palliative care To give this book added credibility and holistic application contributions of women with cancer have been included and the text is interspersed with patient accounts and experiences Women s Cancers is essential reading for all nurses and health care professionals working in cancer care settings as well as patients and families      *Advanced Therapy of Breast Disease* S. Eva Singletary, Geoffrey L. Robb, Gabriel N. Hortobagyi, 2004 The information surveyed in this volulme is designed to provide

the clinician with an expert overview of the current state of the art in breast cancer management. It should provide at least a flavor of the major paradigm shift that is occurring in this rapidly evolving field. Breast cancer management is moving away from a kill or cure model and advancing toward a model focused on strategies of prevention and of long term management of breast cancer as a chronic disease. The acceptance of this new paradigm by patients and clinicians alike will represent a major focus for the twenty first century.

**Psycho-oncologie** Darius Razavi, Nicole Delvaux, 2019-10-22 La prise en charge des patients en oncologie implique tous les acteurs des soins oncologiques : chirurgien, néo-oncologue, oncologue médical, oncologue gynécologue, oncologue pédiatre, psychiatre, psychologue, infirmier, kinésithérapeute, etc. Les interventions sont diverses et spécifiques : les interventions préventives pour éviter le développement d'une morbidité prévisible, la réhabilitation pour réduire ou supprimer les invalidités après la guérison, les interventions de soutien pour accompagner le patient et ses proches lors des phases de diagnostic, de traitement, de rémission ou de survivorship, de progression, enfin la palliation pour améliorer le confort lorsqu'un traitement visé curatif ne peut plus être assuré. Le contenu de cet ouvrage reflète l'état actuel de la clinique psycho-oncologique. Les différents types d'adaptation psychologique et les troubles psychiatriques pouvant survenir sont décrits tant pour les patients que pour les proches. De nombreux concepts sont présentés et discutés : le stress, l'incertitude, la détresse, la souffrance, le déni, les attributions, la résilience, etc. Certaines problématiques particulières sont aussi présentées et développées : les comportements à risque et les facteurs de risque psychologiques liés au développement du cancer, l'adaptation et ses troubles aux différentes phases de la maladie, les troubles cognitifs, la confusion mentale, l'adaptation des proches, les réactions des adolescents et jeunes adultes, les réactions des enfants face au cancer d'un parent, la prise en charge de la douleur, les prises de décisions en fin de vie et le deuil. Les diverses interventions psychologiques spécifiques ou non, ces problématiques sont exposées, information, éducation, thérapies non directives et directives, associées ou non, des traitements psychopharmacologiques. Les auteurs donnent une place particulière à la communication soignant-soigné et donc au rôle primordial de la formation psychologique du personnel soignant afin de permettre la transmission la plus appropriée possible des données complexes liées à la maladie et aux traitements. Cette formation est aussi primordiale pour apporter un soutien tant au patient qu'à ses proches.
