Political Science Methods in Europe Luca Verzichelli,Claudius Wagemann,2025-09-01 This book attempts to provide the first comprehensive description of the complexity and comparative homogeneity of political science methods in Europe today It deals with the present and future of political science methods in Europe in order to explore a multifaceted dilemma concerning not only the prospects for the profession but also political scientists ability to do their part in empowering supranational integration and democracy Thus the book offers a broad analytical reflection on the changing ways that political scientists use methods and methodological tools in their daily work It examines the evolution of processes regarding

the standardization and dissemination of a reliable methodological inventory and invites readers to foster a methodological pluralism and improve the quality of methods available to the community of political science scholars In order to do so it analyzes the development of European Political Science since the turn of the 21st century from the particular angle of the sensibility for questions of methods In a nutshell the common denominator of all chapters is the evolution of the toolkit available to political scientists since they show that the methodological sensibility and specific methodological instruments have since spread across countries disciplines and generations of scholars

The Paradox of Communicable Diseases Governance in the EU Thibaud Deruelle, 2025-06-02 The European Centre for Disease Prevention and Control ECDC has played a pivotal role in the EU's approach to infectious diseases but its journey toward empowerment has been anything but straightforward Historically limited by member states' reluctance to relinquish control over public health the ECDC's mandate was confined to detecting and assessing communicable diseases with no authority to offer advice on how to manage these risks This paradox assessing threats without the power to guide responses has been a defining feature of the Centre's existence However during the Covid 19 pandemic the ECDC's mandate was expanded formally ending this contradiction and allowing the agency to take a more active role in public health decision making

The Paradox of Communicable Diseases Governance in the EU traces the evolving role of the ECDC highlighting its empowerment despite a restrictive legal framework Drawing on over two decades of history of the Centre the book shows how the ECDC navigated the complex landscape of communicable diseases governance The book offers valuable insights into the dynamics of European health governance demonstrating how reputation is key in the development of the most limited agencies It examines the paradox of the ECDC's mandate assessing health risks without the power to recommend actions and how over time institutional entrepreneurs used the Centre's reputation as a useful resource to redefine its role Deruelle offers a fresh perspective on the role of bureaucratic reputation in empowering European agencies showing how even with limited authority institutions can shape policy and practice

EU Policymaking at a Crossroads Sybille Münch, Hubert Heinelt, 2022-12-08 For readers interested in an overview of what led to the adoption of the European Union's Multiannual Financial Framework MFF and its aftermath this book traces the discursive dynamics and milestones of the negotiations around the MFF and the new recovery instrument aimed at alleviating the economic crisis caused by the Coronavirus pandemic

Trade Policy in Multilevel Government Christian Freudlsperger, 2020-04-11 Trade Policy in Multilevel Government investigates how multilevel polities organize openness in a globalizing political and economic environment In recent years the multilevel politics of trade caught a broader public's attention not least due to the Wallonian regional parliament's initial rejection of the EU-Canada trade deal in 2016 In all multilevel polities competencies held by states and regions have increasingly become the subject of international rule setting This is particularly so in the field of trade which has progressively targeted so called behind the border regulatory barriers In their reaction to this deep trade agenda constituent units in different multilevel polities have

shown widely varying degrees of openness to liberalizing their markets Why is that This book argues that domestic institutions and procedures of intergovernmental relations are the decisive factor Countering a widely held belief among practitioners and analysts of trade policy that involving subcentral actors complicates trade negotiations it demonstrates that the more voice a multilevel polity affords its constituent units in trade policy making the less the latter have an incentive to eventually exit from emerging trade deals While in shared rule systems constituent unit governments are directly represented along the entirety of the policy cycle in self rule systems territorial representation is achieved merely indirectly Shared rule systems are hence more effective than self rule systems in organizing openness to trade The book tests its theory's explanatory power on the understudied case of international procurement liberalization in extensive studies of three systems of multilevel government Canada the European Union and the United States ,
