Weinberg, 2014-02-25 This 32nd volume of the Minnesota Symposium on Child Psychology celebrates the 75th anniversary of the University of Minnesota's Institute of Child Development All eight essays are devoted to developmental science its history and current status Taken together the chapters in this book show how the history of science connects past and future how it gives the individual investigator an identity and sense of purpose how contemporary studies occur within larger traditions and how institutions like the Institute of Child Development constitute cultural traditions of their own Collectively these essays show that the past explains a great deal whether we want to know about the processes through which the child acquires symbolic thought or whether we want to know how and why during the last century a few enduring centers were established for the scientific study of children and adolescents Reading these essays one obtains a sense of how the past becomes evidence how it forms models for the way we think and how intellectual challenges arise
