Handbook Of Vegetation Science:

Handbook of Vegetation Science ,1973 **Handbook of Vegetation Science** , Vegetation history Brian Huntley,Thompson Webb III,1988-10-31 The analysis of vegetation history is one of the prime objectives for vegetation scientists In order to understand the recent composition of local floras and plant communities a second knowledge of species com position during recent millenia is essential With the present concern over climate changes due to human activities an understanding of past vegeta tion distribution becomes even more important since the correlation between climate and vegetation can often be used to predict possible impacts to crops and forests I was very fortunate to receive the help of Drs Webb and Huntley to compile this volume on vegetation history They have collated an impres sive set of papers which together give an account of the vegetation history of most of the continents during the late Tertiary and Quaternary periods There are however gaps in the coverage achieved most notably Africa and Asia apart from Japan The information in this book will nonetheless certainly be used widely by vegetation scientists for the regions covered in the book and much of it has relevance to the areas not explicitly described The authors of the individual chapters have done their best to cover recent topics of interest as well as established facts It is intended that a separate volume will be produced in the near future covering the vegetation history of Africa and Asia I thank the editors of It fits well into the this volume for their commendable achievement **Vegetation and Environment** B.R. relevance to the areas not explicitly described The authors of the individual chapters have done their best to cover recent topics of interest as well as established facts It is intended that a separate volume will be produced in the near future covering the vegetation history of Africa and Asia I thank the editors of It fits well into the this volume for their commendable achievement Handbook of Vegetation Science ,1973 *The Population Structure of Vegetation* J. White,1985-09-30 The Handbook of Vegetation Science is growing After the first volumes under my editorship have appeared the interest of the scientific community has been revived and many new volume editors have started their work The present volume was jointly designed by Drs J White and W Beetsink Due to unforeseen developments Dr White signs now as the sole editor The development of this volume within the series had a special history as Dr White points out in his preface Adding to this I need only to state that I found it essential to include the topic of this volume into a Handbook of Vegetation Science It was included therefore in my first revised list of topics to be included in the Handbook when I took over from Dr T xen It is a great pleasure for me to see this volume appear Having read through the many contributions to this volume I can certainly congratulate Drs White and Beetsink for their success in generating so much interest in this volume among their colleagues The cooperation on this volume is forme the first sign that the new concept of the Handbook has been understood by the generation of scientists which I have to address The influence this volume will have on the field of plant population studies only time can tell It appears to me however that this volume will become a standard resource for some future Dr White asked me to have this volume dedicated to Dr Rabotnov Handbook of Vegetation Science ,1973 *Sampling Methods and Taxon Analysis in Vegetation Science* R. Knapp,1984-02-29 *Application of Vegetation Science to Forestry* G. Jahn,1982-02-28 **Handbook of Vegetation Science: Computer assisted vegetation analysis, edited by E. Feoli and L. Orloci** ,1999 Application of Vegetation Science to Grassland Husbandry W. Krause,1977-08-31 WERNER KRAUSE

INTRODUCTION GENERAL COMMENTS ON THIS VOLUME The subject Application of vegetation science to grassland husbandry is not limited by geographical boundaries It is proposed to cover this subject in an internationally applicable work of reference However to avoid omissions it would have to embrace all the diversity of grassland from the Arctic to the Equator The term application requires that the papers contained herein take into account both generally relevant scientific knowledge and the special needs of practical farming The latter are not satisfied solely by the laws of vegetation science the changing effects of the market politics the distribution of wealth and poverty highly developed technology and the continued use of archaic farming methods must all be considered To try to cover all this adequately in one volume of approximately 550 pages is a hopeless task The editor and the authors had to limit themselves to presenting a selection of problems and attempts to solve them with the aim that these examples should indicate how much vegetation science can contribute to grassland husbandry and the scope of this contribution is broadened by the references quoted The arrangement of the sections within this volume does not lend itself to specific suggestions for the management of individual systems However

grassland husbandry can expect to obtain from this work an insight into some overall general relationships which could assist the adviser in the formulation of more specific improvement plans
