Technical Book Review Index ,1926 **Federal Register** ,1945-05 Journal of the Optical Society of America ,1955 **Journal of the Franklin Institute** Franklin Institute (Philadelphia, Pa.),1929 Vols 1 69 include more or less complete patent reports of the U S Patent Office for years 1825 59 Cf Index to v 1 120 of the Journal p 415 The Age of Electroacoustics Roland Wittje,2025-02-18 The transformation of acoustics into electro acoustics a field at the intersection of science and technology guided by electrical engineering industry and the military At the end of the nineteenth century acoustics was a science of musical sounds the musically trained ear was the ultimate reference Just a few decades into the twentieth century acoustics had undergone a transformation from a scientific field based on the understanding of classical music to one guided by electrical engineering with industrial and military applications In this book Roland Wittje traces this transition from the late nineteenth century work of Hermann Helmholtz to the militarized research of World War I and media technology in the 1930s Wittje shows that physics in the early twentieth century was not only about relativity and atomic structure but encompassed a range of experimental applied and industrial research fields The emergence of technical acoustics and electroacoustics illustrates a scientific field at the intersection of science and technology Wittje starts with Helmholtz s and Rayleigh s work and its intersection with telegraphy and early wireless and continues with the industrialization of acoustics during World War I when sound measurement was automated and electrical engineering and radio took over the concept of noise Researchers no longer appealed to the musically trained ear to understand sound but to the thinking and practices of electrical engineering Finally Wittje covers the demilitarization of acoustics during the Weimar Republic and its remilitarization at the beginning of the Third Reich He shows how technical acoustics fit well with the Nazi dismissal of pure science representing everything that German Physics under National Socialism should be experimental applied and relevant to the military *Christoffel, E. B.* Elwin Bruno Christoffel,1981 This memorial volume is dedicated to E B Christoffel on the occasion of the 150th anniversary of his birth Its aim is on the one hand to present the life of Christoffel and the scientific milieu in which he worked and on the other hand to present a survey of his work not only in its historical context but especially in the frame of contemporary mathematics and physics For one thing this book contains expanded versions of the twelve invited lectures given at the International Christoffel Symposium held on November 8 11 1979 at Aachen and Monschau For another the scope of these papers has been broadened by soliciting some forty five additional invited articles concerned either with further aspects of the work of Christoffel or with specialized topics in fields in which Christoffel had worked This should give the reader a greater opportunity to appreciate the richness of Christoffel s contributions to the mathematical and physical sciences and not only its immediate impact but also its subsequent influence It can be discerned that Christoffel did basic work not only in differential geometry or better still in classical tensor analysis thereby supplying the mathematical foundations of Einstein s theory of general relativity but also in a variety of other areas

of mathematics The scope of Christoffel's work can be appreciated from the following synopsis of the thirteen chapters into which the festschrift is divided Chap Osborne Reynolds and Engineering Science Today Jack Allen,1970 Astrophysics V: Miscellaneous / Astrophysik V: Verschiedenes S. Flügge,2012-12-06 Advances in Heat Transfer ,1967-01-01 Advances in Heat Transfer Journal of the Optical Society of America and Review of Scientific Instruments ,1929 **Lehrbuch Der Experimental-physik** Adolph Wüllner,1897 **An Airfoil Spanning an Open Jet** J. Stuper,1933 Proceeding from the fundamental problem on the mutual relation of a wing and free boundaries the distribution of the circulation is determined for an airfoil spanning an open jet of rectangular section at different aspect ratios and then for an open jet of circular section The solution is obtained by means of a Fourier series and computations have been performed for different values of the variables The second part describes the experiments performed for the purpose of proving the theory The results confirm the theory In conclusion it defines the induced drag of a wing extending across an open jet and compares it with the drag of a monoplane having a span equal to the jet width at equal total lift *A Classified Catalogue of Books in European Languages* Tōkyō Bunrika Daigaku. Toshokan,1934 **International Catalogue of Scientific Literature** ,1902 *An Introduction to the Dynamics of Compressible Fluids* Chia-Ch'iao Lin,1947 **Technical Memorandums** United States. National Advisory Committee for Aeronautics,1933 Chiefly translations from foreign aeronautical journals **Nature** ,1924 **Hydrodynamic Instability and Transition to Turbulence** Akiva M. Yaglom,2012-12-18 This book is a complete revision of the part of Monin Yaglom's famous two volume work Statistical Fluid Mechanics Mechanics of Turbulence that deals with the theory of laminar flow instability and transition to turbulence It includes the considerable advances in the subject that have been made in the last 15 years or so It is intended as a textbook for advanced graduate courses and as a reference for research students and professional research workers The first two Chapters are an introduction to the mathematics and the experimental results for the instability of laminar or inviscid flows to infinitesimal in practice small disturbances The third Chapter develops this linear theory in more detail and describes its application to particular problems Chapters 4 and 5 deal with instability to finite amplitude disturbances much of the material has previously been available only in research papers
