Wiesner,1982-04-15 **Cerebral Ischaemia** Jacques Bories,2012-12-06 Numerous meetings have been devoted to cerebral The angiographic study specifies the indications vascular accidents during the last few years Never of angiography in the study of cerebral ischemia and theless our experience at La Salpetriere shows that the techniques to be used It shows the main etiologic cerebral infarcts are not always well explored Indi aspects Because of the important place of vascular cations for angiography today as well as the main surgery today it seemed necessary to show also the CT aspects during the evolution of ischemia seem main post operative angiographic aspects not to be always well known by radiologists We After CT and angiography some pages are re therefore thought it useful to have a special issue de served to more modem techniques positron emis voted to cerebral ischemia this is also the reason sion tomography which will perhaps allow us to bet why this special issue looks more like a thoroughly ter understand the pathophysiological signification worked out study than one exclusively devoted to a of imaging and magnetic resonance imaging which limited number of scientific papers will perhaps allow us to detect ischemic edema in the After a brief clinical and pathophysiological ap reversible stage prior to frank infarction **Gram-Negative Bacterial Infections and Mode of Endotoxin Actions** Bernhard Urbaschek,Renate Urbaschek,Erwin Neter,2012-12-06 The relevance of international symposia and congresses has been questioned with increasing frequency All too often presentations at such meetings are meaningful only for very few members of the audience fundamental scientific principles and relationships between disciplines are not always taken into account Under present conditions rapid sharing of new information is highly desirable However many journals do not lend themselves to speedy exchange of information nor do many provide the opportunity for the publication of discussion by various specialists of problems arising from different disciplines Symposia may lend themselves perhaps more readily to the identification of current knowledge and the exchange

of thoughts between scientists from various fields It was particularly opportune to have the present symposium held in Vienna where as early as 1365 the University was founded and where the medical sciences have played a dominant role in the investigation of the nature of diseases It was the aim of the organizer to provide in this city the opportunity for the exchange of information and of thoughts between scientists from different disciplines and different countries One of the many current important problems relates to the fundamental basis of the pathogenesis of gram negative infections Information on immune mechanisms against these infections is inadequate the relative role of non specific resistance and specific immunity has not been fully elucidated Problems regarding active immunization and the effectiveness of passively administered immuno globulins still exist even today Handbuch der medizinischen Radiologie Olle Gunnar Anton Olsson,1967 *Advances in Radiation Biology* John T. Lett,2013-10-22 *Advances in Radiation Biology* Volume 12 provides an overview of the state of knowledge in the field of radiation biology Environmental matters are continuing to produce surprises and remain sources of concern The safe disposal of radioactive waste still is a major problem facing the nuclear power industry A possible solution is discussed here New information about the survivors from radiation exposure at Hiroshima and Nagasaki has emphasized the consequences of brain damage in the developing embryo the importance of late radiation carcinogenesis and the roles played by age and sex in human radiation responses It also is prompting an increasing number of scientists involved in radiation protection to question the use of small animal models to quantify late radiation effects in humans Contributions to this volume deal with experimental and other aspects of those problems Finally increasing confirmation of the dose rate response for densely ionizing radiations has highlighted the hazard they pose to humans in the terrestrial and extraterrestrial environments Therefore the intention of agencies in the United States and elsewhere to generate better funded and more scientifically perspicacious programs of space radiation biology is welcome Possible interests of the military in that regard are also considered Radiology Today Friedrich H. W. Heuck,Martin W. Donner,2012-12-06 This book reflects the views of an international faculty and provides an authoritative appraisal of modern radiology It represents the second volume in a planned series of competent overviews and is modeled on the successful first volume *Radiology Today* which was enthusiastically received by an international readership We were encouraged by the comments we received to continue blending the latest advances in radiology with comprehensive teaching material concerning modern radiological practice The *Radiology Today* 1982 meeting again brought together outstanding radiologists from Europe and North America for the purpose of sharing their experiences and their viewpoints of the current position and opportunities of imaging in medicine Updating his/her knowledge of advances in medical imaging has become an integral part of continuing medical education for every radiologist Because all imaging modalities are continuously being refined new clinical applications develop and frequently replace more complex or more invasive procedures Also the relationship of imaging procedures to each other changes constantly and with it the configuration of critical diagnostic pathways for

investigation of clinical signs and symptoms To recognize this trend is important because it is expanding the role of the radiologist our involvement in active guidance to the point of the patient's diagnostic workup has increased significantly where it has become strategic
