Dancey,2017-01-24 British Aircraft Manufacturers since 1909 traces one hundred years of the British aviation industry its history origins mergers and takeovers It details the evolution of the British aviation industry and is an epitaph to household famous names such as Armstrong Whitworth de Havilland Chadwick Claude Graham White Sopwith A V Roe Mitchell Hawker Handley Page Petter and Fairey to name but a few Of more recent times the likes of Sidney Camm Hooker and Hooper all of whom made VTOL more than just a dream are also covered in astonishing and exhausting detail Of the major firms most at some time or other have been absorbed merged or reorganised to form a single conglomerate BAe Systems and Rolls Royce are chronicled from the outset to the mighty companies they are today Only PBN Britten Norman who on several occasions escaped extinction due to financial difficulties and Westland now part of AgustaWestland and Short Bros of Northern Ireland remain independent although even the latter are part of Canadian Bombardier Co British Aircraft Manufacturers since 1909 tells the complete and enthralling story of how Britain ruled the world in terms of manufacturing and aircraft design from nimble but fragile biplanes and majestic airliners that united the world to the advanced bombers and fighters of today RAF Bomber Command: 'Strike Hard, Strike Sure' 1936-1945 Ron Mackay,2022-03-31 Historically rich in detail with previously unpublished photographs from private archives Researched and written by an aviation and military historian renowned author Essential for military historians modellers flight sim enthusiasts War Thunder IL 2 Sturmovik Great Battles and DCS and those interested in the complexities of aircraft design and production during the Second World War They sowed the wind and now they are going to reap the whirlwind Arthur Bomber Harris The concept of an aerial campaign on a nation s industrial and military might was advocated by Britain before the start of the First World War however a stringent post war economy ensured that the creation of Bomber Command in 1936 witnessed a daunting disparity between the aim of striking

at an adversary's ability to sustain itself and the means to do so. From 1939 to 1942 Bomber Command was very weak in terms of human and material losses. The navigational means with which to accurately guide bombers to targets was almost completely lacking while the enemy defensive network inflicted serious casualties. Consequently the punishment handed out was minimal. The resurgence of Bomber Command's fortunes coincided with the appointment of Sir Arthur Harris. The advent of four engine designs such as the Avro Lancaster and Handley Page Halifax ensured that a greatly increased bomb tonnage could be delivered. Also electronic aids such as Gee, Oboe and H2S simplified the task in finding targets. Therefore by 1944-1945 the RAF's bombers pulverised Hitler's Third Reich. Although flak and night fighters took a heavy toll on the bombers the RAF's nocturnal offensive in conjunction with the USAAF's daylight assaults crippled Germany's ability to fight back. The Palgrave Concise Historical Atlas of the First World War M. Hughes, W. Philpott, 2005-03-29. The First World War continues to fascinate. Its profound effect on politics and society is still felt today. Yet it remains a greatly misunderstood conflict shrouded in myths and misperceptions. In The Palgrave Concise Historical Atlas of the First World War Philpott and Hughes leading young historians of the conflict draw on recent scholarship to present a clear introduction to the war. In fifty maps accompanied by supporting text and statistical tables they survey the main battles and political features of the war. This concise volume will give students and general readers important insights into the nature and effects of world war. The Archaeology of the Royal Flying Corps Melanie Winterton, 2022-10-07. Winterton's book is a good introductory effort on the haptic environment of World War I aviators and their personal artifacts. The Journal of the Air Force Historical Foundation Archaeology provides a fascinating insight into the lives of the aviators of the First World War. Their descriptions of the sensation of flying in the open cockpits of the primitive warplanes of the day and the artifacts that have survived from these first years of aerial combat give us a powerful sense of what their wartime service was like and chart the beginning of our modern understanding of aviation. But the subject hasn't been explored in any depth before which is why Melanie Winterton's pioneering book is so timely. Hers is the first study of the trench art souvenirs and lucky mascots associated with the Royal Flying Corps which in an original way tell us so much about the experience of flying on the Western Front a century ago. Extensive quotations from the memoirs of these early airmen are combined with an analysis of the artifacts themselves. They convey something of the fear and anxiety the airmen had to grapple with on a daily basis and bring out the full significance of the poignant souvenirs they left behind. Pieces of crashed aeroplane, wooden propellers, strips of linen, fragments of metal were recycled and circulated during the war and afterwards became the focus of attention in the domestic home. As Melanie Winterton demonstrates these items connected the living with the deceased which is why they are so strongly evocative even today. World War I Spencer C. Tucker, 2014-10-28. Offering exhaustive coverage, detailed analyses and the latest historical interpretations of events, this expansive five volume encyclopedia is the most comprehensive and detailed reference source on the First World War available today.
