Exhibitions Tim Caulton, 2006-04-14 The development of interactive displays has transformed the traditional museum world in the last decade Visitors are no longer satisfied by simply gazing at worthy displays in glass cases they expect to have hands on experience of the objects and be actively involved with the exhibits learning informally and being entertained simultaneously Hands on museums and science centres provide the most remarkable example of how museums are redefining their roles in society improving access to real objects and real phenomena so that they can be enjoyed by more people In recent years museums have been thrust into intense competition for the public's time and money with all branches of the leisure industry from commercial theme parks to retail shopping and home entertainment This has upset the traditional stability of the museum and their visitors A hands on approach encourages a broader visitor base which in turn helps to bring in additional revenue at a time of declining public subsidy Tim Caulton investigates how to create and operate effective exhibitions which achieve their educational objectives through hands on access He concludes that the continuing success of hands on museums and science centres hinges on attaining the very best practice in exhibition design and evaluation and in all aspects of operations including marketing and financial and human resource management Hands On Exhibitions provides a practical guide to best practice which will be indispensable to all museum professionals and students of museum studies

Keyes, 2024-02-27 Education is Freedom explores the transformative power of education and its ability to liberate individuals and societies from the constraints of ignorance inequality and oppression In this book author James Keyes explores the ways education empowers people to take control of their lives to pursue their dreams and to contribute to the world in meaningful and fulfilling ways He provides a roadmap to the why what and how of learning The book outlines the importance of education for all mankind the power of education to change our world and the wisdom to unlock our personal freedom while preserving our democracy Where does humanity go to school Democracy across the world is at risk With the polarization of today's society the foundational right to freedom of speech is now being challenged from all sides The truth is under siege as misinformation and hostility have replaced critical thinking and civil discourse Our freedom of self determination has a prerequisite an informed electorate If that electorate is armed with false information or is influenced by outside forces their actions and reactions can put democracy in jeopardy Today more than ever we must nurture the education knowledge and wisdom of individuals to discern right from wrong truth from fiction and success from failure If learning is the key to success then how can humanity advance its own cause Our forefathers recognized that an educated populace was the very foundation of democracy Education is a self help guide for humanity that allows us to individually and collectively understand the roadmap to freedom For the individual education is the one common denominator that separates those who are free from the ones trapped in their own reality Someone can take your money your material things your job but they can't take away what you know With knowledge you can replace anything lost you can be free to explore the world you are beholden to no one Whatever challenges or adversity

you face in life embracing a learning mentality will empower you and set you free Humanity must indeed go back to school because the future is in our hands
