Hands-on Networking with Internet Technologies Douglas Comer,2005 This text is for one two semester undergraduate courses in network programming and administration It takes the view that hands on experience affords a deeper understanding of computer networks and the Internet than pure theory **Hands on Networking with Internet Technologies** Douglas E. Ad Hoc and Sensor Networks, Wireless Networks, Next Generation Internet Ian F. Akyildiz,2007-04-27 This book constitutes the refereed proceedings of the 6th International IFIP TC6 Networking Conference NETWORKING 2007 held in Atlanta GA USA in May 2007 The 99 revised full papers and 30 poster papers were carefully reviewed and selected from 440 submissions The papers are organized in topical sections on ad hoc and sensor networks connectivity and coverage scheduling and resource allocation mobility and location awareness routing and key management wireless networks mesh networks mobility TCP MAC performance as well as scheduling and resource allocation next generation inte *Activism on the Web* Veronica Barassi,2015-05-22 Activism on the Web examines the everyday tensions that political activists face as they come to terms with the increasingly commercialized nature of web technologies and sheds light on an important yet under investigated dimension of the relationship between contemporary forms of social protest and internet technologies Drawing on anthropological and ethnographic research amongst three very different political groups in the UK Italy and Spain the book argues that activists everyday internet uses are largely defined by processes of negotiation with digital capitalism These processes of negotiation are giving rise to a series of collective experiences which are defined by the tension between activists democratic needs on one side and the cultural processes reinforced by digital capitalism on the other In looking at the encounter between activist cultures and digital capitalism the book focuses in particular on the tension created by self centered communication processes and networked individualism by corporate surveillance and data mining and by fast capitalism and the temporality of immediacy Activism on the Web suggests that if we want to understand how new technologies are affecting political participation and democratic processes we should not focus on disruption and novelty but we should instead explore the complex dialectics between digital discourses and digital practices between the technical and the social between the political economy of the web and its lived critique **Enabling Optical Internet with Advanced Network Technologies** Javier Aracil,Franco Callegati,2009-06-20 This book provides a broad overview of IP over WDM technologies as seen by a group of experts participating in the e Photon ONeC and BONE Networks of Excellence funded within the VIth and VIIth Research Framework Programmes FP6 and FP7 of the European Union Both Networks of
