Handwriting Analysis Plain & Simple Eve Bingham, 2019 Handwriting analysis or graphology is the science involved in producing a personality profile of the writer by examining the characteristics traits and strokes of an individual's handwriting. It seems impossible but a trained graphologist can gather an astonishing amount of information about the writer just from analyzing their handwriting. Besides creating a complete personality profile many other things are revealed in your handwriting such as health issues, morality, past experiences, hidden talents, mental problems, to name just a few. This plain and simple title explains what handwriting analysis is and why it works. The author gives a brief history of the art then delves into every aspect of writing including the way the writing moves across the page, the meaning of the pen, pencil and ink chosen, the slope of the script and the amount of space between words, the size and shape of the individual letters and signatures, the meaning of writing styles in headed paper, logos and shop signs.
