Do School Districts Have the Tools They Need to Hire Effective Teachers? Michelle Leake, University of Texas at Dallas, Graduate Program in Public Policy and Political Economy, 2013. The purpose of this study is to determine the extent to which teachers' academic and professional characteristics predict their classroom effectiveness as measured by value-added indicators of their students' growth. Teachers' college transcripts, service records, and district records of classroom assignments are used to examine undergraduate content and pedagogy courses, graduate work, and professional experience. The district's own value-added indices are utilized as the measure of teacher effectiveness. The study examines a subset of 318 teachers who were continuously employed over a four-year period at one of 19 hard-to-staff secondary schools in one of the nation's largest school districts. The study finds that local experience and college coursework in the teacher's assigned content modestly predict the teacher's classroom effectiveness, which has implications for hiring practices in public schools.

Effective Schools Susanna Loeb, Demetra Kalogrides, Tara Bêteille, 2011 The literature on effective schools emphasizes the importance of a quality teaching force in improving educational outcomes for students In this paper we use value added methods to examine the relationship between a school s effectiveness and the recruitment assignment development and retention of its teachers We ask whether effective schools systematically recruit more effective teachers whether they assign teachers to students more effectively whether they do a better job of helping their teachers improve whether they retain more effective teachers or whether they do a combination of these processes Our results reveal four key findings First we find that more effective schools are able to attract and hire more effective teachers from other schools when vacancies arise Second we find that more effective schools assign novice teachers to students in a more equitable fashion Third we find that teachers who work in schools that were more effective at raising achievement in a prior period improve more rapidly in a subsequent period than do those in less effective schools Finally we find that more effective schools are better able to retain higher quality teachers though they are not differentially able to remove ineffective teachers The results point to the importance of personnel and perhaps school personnel practices for improving student outcomes
