Effective Treatment Strategies for Children with Autism in Grades K-6 Lisa Marie Blakley, 2014 The incidence of children with Autism Spectrum Disorders ASD continues to rise in our elementary schools With this increase more and more children with ASD are present and requiring services in public school classrooms As teachers and parents we need to know how to provide classroom interventions in order to optimize learning with this group of children and be able to successfully integrate these students within our classrooms and schools In order to accomplish this we need to explore effective strategies to produce positive learning and behavior outcomes The literature selected and researched for the purpose of this proposal supports using effective teaching strategies with measureable results for our students on the autism spectrum The sampling groups chosen for the research are the professionals who are currently using effective treatment methods with autistic children in the classroom setting Results indicate a wide variety of treatment strategies that address social and communicative behavioral and academic needs for students on the Autistic Spectrum Although there are several promising practices occurring within classrooms this proposal focuses primarily on evidence based practices that demonstrate successful outcomes for students within an inclusive setting *Authoring Autism* M. Remi Yergeau, 2018-01-05 In *Authoring Autism* M Remi Yergeau defines neurodivergence as an identity neuroqueerness rather than an impairment Using a queer theory framework Yergeau notes the stereotypes that deny autistic people their humanity and the chance to define themselves while also challenging cognitive studies scholarship and its reification of the neurological passivity of autistics They also critique early intensive behavioral interventions which have much in common with gay conversion therapy and questions the ableist privileging of intentionality and diplomacy in rhetorical traditions Using storying as their method they present an alternative view of autistic rhetoricity by foregrounding the cunning rhetorical abilities of autistics and by framing autism as a narrative condition wherein autistics are the best equipped people to define their experience Contending that autism represents a queer way of being that simultaneously embraces and rejects the rhetorical Yergeau shows how autistic people queer the lines of rhetoric humanity and agency In so doing they demonstrate how an autistic rhetoric requires the reconceptualization of rhetoric s very essence *California.
