**Effectiveness in Education and Training** Max Taylor, 1990 *Learning at the Crossroads of Theory and Practice* Piet Van den Bossche, Wim H. Gijssels, Richard G. Milder, 2012-03-19 Core concepts in education are changing For example professional performance or expertise is not uniquely the fruit of specialist knowledge acquired at professional schools but the sum of influences exerted by a complex web of continuous learning opportunities for which an individual is well or ill prepared by their schools and their workplace The key contributory factors to professional expertise are how professional schools connect to professional practice how schools prepare graduates for continuous learning and how the workplace endorses continuous development Thus the question this volume addresses how to design learning and working environments that facilitate the integration of these three elements is at the heart of contemporary pedagogical theory The authors also ask a second vital question how do we educate learners that go on to maximize their life's learning opportunities by regulating their own ongoing learning Learning at the Crossroads of Theory and Practice argues that with the theory of learning at a crossroads this is an unprecedented opportunity for learning about learning The book sheds light on different elements of this challenge integrating theory and practice in business education generating and fully exploiting workplace learning opportunities and enriching our classrooms by coupling theoretical knowledge with the richness of real life experience *Army Organizational Effectiveness Journal*, 1982 *Humanistic Social Work - The THIRD WAY in Theory and Practice*, This book represents a new stage in the author's project to contribute at the development of the humanistic social work theory and methodology with special attention paid to the professional practitioner social worker caregiver psychologist etc to his psychological spiritual and humane qualities and conducts in practice In the PART I is presented THE HUMANISTIC SOCIAL WORK PROJECT the author's initiative started in 2009 with the assumed aim to enhance the effective presence of the humanistic values theories and practices in contemporary social work a theoretical axiological and methodological framework a heuristic laboratory a philosophical scientific and professional forum wherein it can be set what could be called the theory axiology and methodology of the Humanistic Social Work PART II HUMANE AND SPIRITUAL QUALITIES OF THE PROFESSIONAL IN HUMANISTIC SOCIAL WORK is the basic body of the paper and is composed predominantly of three chapters The Chapter 1 Humanistic Social Work The Third Way in Social Work Theory and Practice is devoted to present theoretically the concept doctrine and specific of humanistic social work with emphasis on its main sources values theories practices and methods to circumscribe philosophically and doctrinally Humanistic Social Work as the third way alongside Traditional Conventional Social Work and Radical Critical Social Work in the contemporary social work practice and theory with the assumed claim to imposing even as dominant in the future The Chapter 2 Humane Personality and Soul Personal Psychological Sources of the Professional's Humane and Spiritual Qualities shows what might be called in the author's view the personal psychological sources of the professional's humane and spiritual qualities in humanistic social

**Theory and Empirical Practice in Research on Social and Emotional Skills** Miloš Kankaraš, Filip De Fruyt, Ricardo Primi, 2022-09-22 **Ego Development for Effective Coaching and Consulting** Thomas Binder, 2023-06-12 Both in research and in practice a number of basic competencies are considered necessary for successful process oriented coaching and consulting activities In the present research work the extent to which these necessary competencies are related to vertical personality development was investigated Loevinger s model of ego development a stage theory of development provides the frame of reference for this study This paper fully summarizes the current state of research on the model in order to comprehensively analyze possible relationships with coaching and consulting competencies As a first step the competency requirements of selected coaching and consulting associations were analyzed to determine whether they are related to ego development and whether they express minimum requirements for ego development The analysis revealed that the competency requirements of all associations show clear parallels to aspects of ego development

The majority of these requirements point to a fully developed self governed stage E6 of ego development as a prerequisite for process oriented coaching and consulting services In a second step empirical studies were examined to systematically analyze the relationship between ego development and aspects relevant to coaching and consulting The results of the current empirical studies show a clear correlation between these competencies and ego development This means that as ego development increases higher coaching and consulting competencies become more likely Many studies also indicate that a fully developed self governed stage of ego development can be expected as the basis for consistent work at an intermediate level of competence **Office of Education Research Reports** Educational Resources Information Center (U.S.),1967
